Guide to the usage of this Handbook

The following is a general overview of the structure of this Handbook for the guidance of users. The contents are organised in a number of different sections (see below) each of which has a particular focus. The sections are interlinked by cross-references where relevant.

(a) **General Information:** This section lists the faculty staff, terms for the current year, lecture periods, a key (guide) to the course code system and definitions of terminology used. It includes information on the professional status and recognition of the Faculty's degrees, its links with professional bodies and the list of qualifications offered.

(b) **Faculty Rules for Postgraduate Qualifications:** This section covers the Faculty rules for each of the various programmes. These rules should be read in conjunction with the general University rules in the General Rules and Policies Handbook (Handbook 3). Students are expected to acquaint themselves with the rules in both Handbooks, to check annually whether the rules or curriculum requirements have changed since the last edition and to take particular note of the following:
   - rules relating to registration and examinations;
   - rules relating to changes of curriculum;
   - rules relating to leave of absence;
   - rules on Academic Conduct;
   - rules concerning dishonest conduct and plagiarism.

Detailed information on the undergraduate entrance requirements can be found in the University Prospectus.

This section includes a full list of postgraduate qualifications and specialisations offered by the Faculty and the curriculum for each programme (list of required courses) is set out in detail.

(c) **Departments and Centres in the Faculty of Humanities and in other Faculties offering Postgraduate Degree and Diploma Courses:** This section contains entries for each department in the Faculty listing members of staff and the research entities, if any. The full list and descriptions of courses offered are laid out in alpha-numeric order (i.e. based on the course code prefix). The courses offered by other faculties which are more commonly taken by students in the Faculty of Commerce and Law are also listed and described.

(d) **Centres/Institutes in the Faculty:** These are entries for the principal Faculty entities/units which do not fall directly under academic departments e.g. the Institute for Humanities in Africa.

(e) **Additional information:** This section lists the fellows, distinguished professors and teachers in the faculty. It also includes lists of the various prizes and scholarships awarded on academic merit awarded by departments.

List of Departmental Letter Codes

In numerous instances courses are referred to through use of their codes. To assist students a list of departmental letter codes is given below. This is not a comprehensive list, but includes those teaching courses most frequently taken by students in this Faculty. In cases where a code is not understood, the department should be identified from the list, and then the departmental entry in this Handbook, or the Department itself, should be consulted.

### Structure of Course Codes

The code structure is uniform and it gives important information about the course. Each code has eight characters, as follows: `AAA1nnnS`, where

- **AAA** is a 3 alpha-character group identifying the department
- **I** is a number representing the year of study in which the course is usually taken
- **nnn** is a 3 character number that identifies the course uniquely
- **S** is a single alpha-character suffix, giving information about the duration and semester placement of the course

Suffixes which are most frequently used in the Faculty are:

- **F** First semester course
- **S** Second semester course
- **W** Whole-year course
- **H** Half-course taught throughout the year
- **Z** Non-standard period

Summer/Winter Term courses:

- **P** November - December
- **U** November - January
- **L** June - July

The following examples show how the codes work:

ELL1013F  English Literary Studies
- ELL designates an English course
- 1 designates a first year course
- 013 serves to distinguish this course from other first year English courses
- F designates a first semester course

HST2037S  African Economic History
- HST designates a History course
- 2 designates a second year course
serves to distinguish this course from other second year History courses

S designates a second semester course

### Abbreviations and Definitions

**Concession**: Formal Senate approval exempting a student from complying with a required rule.

**Co-requisite**: A subject or course for which a student must be registered concurrently with (at the same time as) another course.

**Pre-requisite**: A subject or course that a student must have completed in order to gain admission to another (usually a more senior) course.

**Curriculum**: Prescribed course of study for a degree or diploma.

**DP (Due Performance) requirement**: Required minimum level of performance during the semester or year to qualify a student to do an examination in a particular course or module.

**Exemption**: Exemption from a course means that the student need not register for this course since he/she has studied a sufficiently similar course before. He/she is granted credit for the course studied before.

**Continuous assessment**: Evaluation of a student's performance (by means of written, oral or practical work) during the year, before the final examination in a particular course.

**NQF credits, HEQSF qualification levels and HEQSF course levels**:

All South African tertiary institutions are required to align their qualifications with the prescriptions of the national Higher Education Qualifications Sub-Framework. Each qualification has an exit level and is required to have a minimum number of HEQSF credits at that level. One credit equals 10 notional hours of learning.

The HEQSF requires the following credits per qualification:

- **Postgraduate Diploma (exit level 8)**: Minimum total credits: 120, minimum credits at level 8: 120.
- **Bachelor Honours degree (exit level 8)**: Minimum total credits: 120, all at level 8.
- **Master’s degree (exit level 9)**: Minimum total credits: 180. Minimum credits at level 9: 120; maximum credits at level 8: 60. (A full dissertation master’s will be 180 credits at level 9).
- **Doctoral degree (exit level 10)**: Minimum total credits: 360 at level 10.

**Programme, qualification and specialisation**: A programme is a purposeful and structured set of learning experiences that leads to a qualification. Within a qualification (e.g. Master of Social Science) there may be various specialisations (for example a Sociology or Justice and Transformation specialisation in the MSocSc). In some cases there is a single programme within a qualification.

**Specialisations**: Within a postgraduate programme there may be several “specialisations,” each of which has its own plan code.

**Named qualification vs. specialisations in a “generic” qualification**: Special application must be made to the Higher Education Qualifications Council to use the full name of a programme, e.g. Master of Arts in Clinical Psychology as opposed to Master of Arts with a specialisation in Creative Writing.
Programme/course convenor: Academic staff member in charge of offering the degree or diploma programme or a course within the degree or diploma programme.

Psychology
To become a Psychologist in one of the recognised areas of Psychology, namely Clinical, Counselling, Educational, Organisational and Research Psychology, a student must complete a recognised Master's degree in Psychology and an appropriate practicum at a recognised training institution. The duration of a practicum is 12 months. Persons registered from 1 January 2005 in addition will have to write an examination set by the Professional Board for Psychology.

The Department of Psychology at the University of Cape Town provides training leading towards registration in Clinical Psychology. The School of Management Studies in the Faculty of Commerce provides training leading towards registration in the fields of Organisational Psychology.

Social Work
Practice in the field of Social Work is regulated by the Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training in terms of these standards.

Under current legislation, the minimum requirement for professional registration with the Council is a 4-year BSW degree. Students registered for the BSW degree are required to register as student social workers from the second year of study.

The South African Council for Social Service Professions will accept the UCT 3-year BSocSc(SW) degree plus an Honours degree offered by the Department of Social Development as equivalent to the BSocSc(SW) 4-year degree for registration as a Social Worker.

NOTE: Those students who registered prior to 1988 and completed the BSocSc (B curriculum) degree must be in possession of the BSocSc(SW) Honours degree or the Advanced Diploma in Social Work to qualify for professional registration with the Council for Social Service Professions.

**Postgraduate Diploma in Fine Art (120 NQF credits)**  
**[FIN01]**

The Postgraduate Diploma in Fine Art offers a coherent, graduate study path for artists and teachers who have Fine Art degrees and wish to upgrade their academic status, or those who have not yet acquired degree status, but who hold recognised diplomas in aspects of the visual arts. This programme develops practical skills and conceptual thinking in fine art practice. Students work within a studio of senior students and develop a practical proposal of choice. This culminates in a professional exhibition at the end of the year of study that demonstrates a sound understanding of contemporary practice. The submission is accompanied by a visual catalogue with an introductory essay. A weekly reading group introduces core readings and critical issues.

**Admission requirements**

**FH3 3.1** A person shall not be admitted as a candidate for an Honours degree unless he/she is:

(a) a graduate of the Faculty who has been awarded a Bachelor’s degree with the equivalent of a major in the subject in which he/she proposes to proceed to Honours, or has subsequently met the conditions which would have enabled him/her to be awarded the degree with that subject as a major subject, and has satisfied such other conditions as departmental rules may require; or

(b) a graduate of any other faculty in the University who has completed courses accepted by the Senate as equivalent to
those required under 3.1(a) above; or
(c) a graduate of any other university recognised by the Senate for such purpose who has completed courses accepted by the Senate as equivalent to those required under 3.1(a).

3.2 A person must comply with any additional admission requirements prescribed for the programme for which he or she wishes to be admitted as a candidate.

Registration date
FH4 Except where another date is set, a candidate for the Honours degree shall register not later than the Friday of the week preceding the start of the academic year.

Registration and readmission requirements
FH5 5.1 Full-time study
Except by permission of Senate, a full-time candidate shall attend and complete the work prescribed for the degree within one year of full-time study.

5.2 Part-time study
(a) A two-year programme may be offered for *bona fide* part-time students by any department in the Faculty which offers an Honours course, at the discretion of the Head of the Department concerned. Applications from students for the two-year programme shall be submitted, together with evidence that the applicant is a *bona fide* part-time student, by the Head of the Department concerned to the Board of the Faculty for approval.

(b) A part-time candidate shall attend and complete the prescribed work for the degree within two years of part-time study.

5.3 Readmission requirements
Except with the permission of Senate, students registered for a programme of study towards an Honours degree shall be excluded from the Faculty if they have not passed at least half of the credits required for the programme.

Note: Where the same course is offered for both the honours (HEQSF level 8, 4000 level) and masters (HEQSF level 9, 5000 level) degrees, students must register for the course appropriate to their current qualification level. Students who have completed the 4000-level version of a course are excluded from enrolling on the 5000-level version of the same course and vice versa.

Extended Honours programme
FH6 In exceptional circumstances, the Senate may permit a graduate it deems worthy on academic grounds but who does not have an adequate undergraduate background, to undertake a full-time Honours programme over two years. In such a case, the candidate must complete in the first year courses prescribed by the Senate, chosen to strengthen his/her background, and may undertake a portion of the Honours programme, provided that this portion does not exceed 30% of the full programme. Such a student shall register as an occasional student in the first year. On successful completion of the first year, he/she will be permitted to register as an Honours candidate, and complete the remainder of the Honours programme in the second year.

Obtaining the degree
FH7 An Honours candidate shall not attend courses not included in the work prescribed for the degree, or write examinations other than those prescribed for the degree,
except by permission of Senate.

Assessment

FH8 8.1 The Honours examination shall consist of such written papers and such oral, practical and other tests as may be prescribed from time to time.

Research that involves human participants or animal use for research or teaching must undergo ethics review, according to faculty-specific guidelines. Review generally entails prior approval of a research proposal by a Research Ethics or Animal Ethics Committee. In cases where prior approval is not appropriate, the research proposal should be subjected to appropriate deliberative procedures, according to faculty-specific guidelines. Research papers or dissertations that involve human participants or animal use may not be submitted for examination if they have not undergone any ethics review process.

8.2 A candidate is required to pass each component of the Honours programme.

8.3 The names of the successful candidates in the Honours examination shall be published in three classes.

8.4 Unless otherwise specified, the research essay/project component of the Honours programme should be 15,000 words in length.

8.5 Unless otherwise specified, any research essay component of a full-time Honours programme shall be submitted for examination by no later than 15 November of the candidate's first year of study.

8.6 A candidate shall comply with such other requirements for specific programmes as the Senate may prescribe.

Re-examination

FH9 A candidate who fails an Honours course will not be permitted to repeat the course but may replace it with another course, provided it is not a core or compulsory course for the programme. Senate permission is required to substitute a core/compulsory course.

Concession

FH10 Any exemption from or modification of the above rules is subject to approval by the Senate.
The following rules must be read in conjunction with the general rules for the degree of Master and the degree of Master of Philosophy in Handbook No 3.

**Admission requirements**

FM3 3.1 Except by permission of the Senate a person shall not be admitted as a candidate for the degree unless he or she is an Honours graduate of the Faculty, or a graduate of this or another faculty or another university who holds a degree recognised by the Senate for this purpose.

3.2 The Honours degree, or its equivalent, normally shall be in the subject in which the candidate wishes to pursue his/her studies for the degree.
3.3 If the Honours degree has been taken in a combination of language subjects, a candidate may proceed to the MA degree in one of those subjects on the recommendation of the Head of the Department concerned and with the approval of the Faculty Board.

3.4 By permission of the Senate, on the recommendation of the Faculty Board and the Head of the Department concerned, a person may be admitted as a candidate for the Master’s degree after completing a three-year Bachelor’s degree. In such cases the Master’s degree shall not be awarded until at least two years after the completion of the Bachelor’s degree by virtue of which the student was accepted.

3.5 Unless otherwise specified, a candidate for the Master’s programme must achieve an average of not less than 60% in the Honours year to be accepted.

3.6 A person must comply with the admission requirements prescribed for the programmes for which he or she wishes to be admitted as a candidate.

3.7 On applying for admission to the Master’s degree by dissertation, each candidate shall submit a proposal for approval and must satisfy the Senate as to the suitability of his or her subject and the conditions under which it will be carried out.

3.8 Admission is on the recommendation of the Programme Convenor and/or the Head of Department.

**Registration and readmission requirements**

**FM4 4.1 Minimum period**

(a) Except where otherwise determined for specific degree specialisations, a candidate for the degree shall be registered as such for at least one year, provided that a candidate, whom the Senate has permitted to register without an Honours degree or its equivalent, shall be registered for at least two years.

(b) In the case of the degree of Master of Fine Art, a candidate must be registered for the degree for at least two years.

4.2 Readmission requirements

(a) Candidates registered for a master’s degree are expected to complete within two years of registration.

(b) Except with the permission of Senate, students registered for a programme of study towards a master’s coursework degree shall be excluded from the Faculty if they have not passed at least half of the semester courses required for the programme.

(c) A research candidate shall obtain permission from the Faculty Board for each succeeding year of registration and must satisfy the Board that there are adequate grounds for the granting of such permission. The Board’s decision shall be based on the supervisor’s progress report.

4.3 A candidate shall not attend courses not included in the work prescribed for the degree, or write examinations other than those prescribed for the degree, except by permission of Senate.

**Note:** Where the same course is offered for both the honours (HEQSF level 8, 4000 level) and masters (HEQSF level 9, 5000 level) degrees, students must register for the course appropriate to their current qualification level. Students who have completed the 4000-level version of a course are excluded from enrolling on the 5000-level version of the same course and vice versa.
Registration dates
FM5  Except where earlier dates are set for specific specialisations:
5.1 a candidate registering for the first time for the degree by dissertation only may register at any time up until 1 May;
5.2 a returning candidate for the degree by dissertation only must register by not later than the last Friday of February each year;
5.3 a candidate for the degree by coursework and dissertation must register by not later than the Friday of the week preceding the start of the academic year;
5.4 a candidate who fails to register by the required date and who is permitted to register late shall be liable for a late registration fee.

Examination
FM6  6.1 The degree may be conferred after the acceptance of a dissertation on an approved topic embodying research under the guidance of a supervisor appointed by the Senate, or after the candidate has satisfactorily completed advanced courses of study as prescribed by the Senate, or by a combination of dissertation, advanced courses of study, and a creative and/or practical component. In all cases an oral examination may be required.

Research that involves human participants or animal use for research or teaching must undergo ethics review, according to faculty-specific guidelines. Review generally entails prior approval of a research proposal by a Research Ethics or Animal Ethics Committee. In cases where prior approval is not appropriate, the research proposal should be subjected to appropriate deliberative procedures, according to faculty-specific guidelines. Research papers or dissertations that involve human participants or animal use may not be submitted for examination if they have not undergone any ethics review process.

6.2 In the case of examination by coursework and dissertation, a candidate must obtain at least 50% for each coursework component and for the dissertation.

6.3 The dissertation
(a) must be satisfactory in arrangement and expression and must be typewritten or printed;
(b) must be prefaced by an abstract prepared according to the guidelines approved by the Senate;
(c) must show thorough practical and/or academic knowledge of the approved subject and methods of research, and evidence of independent critical power in the handling and interpretation of material already known or newly discovered;
(d) may embody such original work of others as may be pertinent;
(e) must contain correct and proper acknowledgements of all sources;
(f) may include the candidate's own published material on the same subject, if the prior permission of the Senate has been obtained;
(g) must include in the title page a signed declaration that the work has not previously been submitted in whole or in part for the award of any degree;
(h) that it is the candidate’s own work and that any
contributions to and quotations in the dissertation have been cited and referenced.

6.4 Unless otherwise specified, the dissertation component of a coursework Master’s degree shall be not more than 25,000 words in length, while that of a research Master’s degree shall be not more than 50,000 words in length.

6.5 A candidate shall comply with such other requirements for specific specialisations as the Senate may prescribe.

6.6 A candidate shall not be permitted to graduate until any corrections and alterations required by the Senate have been made to the copy of the dissertation, plus a read-only version on compact disc.

6.7 Unless otherwise specified, the Master’s degree will be awarded with distinction if the candidate obtains an overall average mark of 75% or higher and not less than 70% for any component of the degree.

6.8 A candidate whose dissertation is failed will not be allowed to present him/herself as a candidate for the Master’s degree again for the examination in the same field of study, but may, with the permission of Senate, be admitted to another field of study.

6.9 A candidate who fails a Masters course will not be permitted to repeat the course but may replace it with another course, provided it is not a core or compulsory course for the programme. Senate permission is required to substitute a core/compulsory course.

Submission of dissertation

FM7 7.1 Where a candidate intends to submit his or her dissertation or research project for examination, he or she must inform the Faculty office in writing of his or her intention to do so six weeks before submitting the dissertation for examination (see GM17 in the University General Rules, Handbook No.3). Notification of the intention to submit should be submitted electronically, using PeopleSoft.

7.2 It is recommended that the dissertation be submitted for examination five months before the graduation ceremony to allow time for the examination process to run its course. The University does not undertake to reach a decision on the award of the degree by any specific date.

Note: Graduation dates are published in the academic calendar available on the university website.

7.3 A rebate on the annual academic fee for a doctoral thesis or master’s dissertation is granted for submission according to the schedule published in the Fees Handbook.

Note: Candidates who submit by 12 noon on the first day of the new academic year will not be required to re-register.

7.4 Candidates are required to submit the final .pdf version of their dissertation on PeopleSoft together with a Turnitin Originality Report which has been signed off by the supervisor/s.

7.5 No dissertation, or part thereof, which has previously been submitted for examination for any degree at any university, may be submitted for, or may be accepted for a Master’s degree in the Faculty.

Declaration

FM8 8.1 The dissertation must be accompanied by an undertaking in writing, signed by the candidate, empowering the University to reproduce for the purpose of research either the whole or any portion of the contents in any manner whatsoever, unless this requirement is waived by the
In the case of the Creative Writing specialisation, the dissertation must be accompanied by an undertaking in writing, signed by the candidate, empowering the University to publish the work in whole or in part in any format the University deems fit, on the understanding that:

(a) the University will not publish or reproduce any part of the dissertation that has been published by the candidate, while it is in print, other than by placing a copy of the work in UCT libraries;

(b) the University will not publish or reproduce the creative work that forms part of the dissertation without consulting the candidate (or the candidate’s literary executor) and will not publish or reproduce this if firm arrangements have been made to publish this within twelve months of the date on which the University approached the candidate.

Revision of dissertation
FM9 9.1 Except on the recommendation of the supervisor and with the approval of the Faculty Board, a candidate whose dissertation has been returned for revision must submit a revised dissertation for examination no later than one calendar year after the date of original submission. Such resubmission must comply with Rule FM7 above.

9.2 No candidate shall be invited more than once to revise and resubmit his/her dissertation.

Upgrading from Master's to PhD
FM10 Senate may, on the recommendation of the Faculty Board and the candidate's supervisor, upgrade a candidate's registration on the grounds of the quality and development of the candidate's work.

Publication
FM11 11.1 No publication may, without the prior permission of the University, contain a statement that the published material was or is to be submitted in part or in full for the degree.

11.2 The candidate may publish the creative work once the examination process has been completed.

Concession
FM12 Any exemption from or modification of the above rules shall be subject to the Senate's approval.

Anthropology master’s and doctoral students are required to spend a period of up to one semester in residence in Cape Town, preparing/finalising a research proposal/research design and at least one further semester in residence while writing their dissertations/theses. Candidates are required to participate in the Section’s weekly research seminar.

MA/MSocSc specialising in Practical Anthropology [AXL08]:
The specialisation focuses on Anthropology in the Public Sphere and courses are structured around careful analyses of interventions in that sphere. Graduates will be proficient in analysing current theory, policy and practice relating to social interventions using critical theory and a range of social science and social-cultural research methods.
Graduates will have been trained in a detailed and stringent anthropological critique of current public sphere interventions as they pertain to particular regional concerns.
Specific focuses will change from year to year, and may include development issues, medical anthropology, media and film, conflict resolution, among others.

MA/MSocSc specialising in Anthropology [AXL10]:
This specialisation aims to enable students to develop a comprehensive grasp of the discipline of social-cultural anthropology, its present approaches and theories as well as its theoretical and ethnographic roots. The specialisation is structured around a series of taught courses and seminars preparing candidates for professional entry into the discipline in both teaching and research positions. Its focus is on both the history of, and cutting-edge work in, the discipline. Graduates will be proficient in a range of theory and familiar with an extensive body of ethnography - with a strong comparative focus on Africa. They will also have developed strong critical social-cultural research skills that can be applied in a wide range of areas.

Prescribed curriculum:
Master’s students are required to complete a minor dissertation and four taught courses of which no more than two can be at HEQSF level 8 (4000 level).

Master of Fine Art (180 NQF credits) (HEQSF level 9)

[FIN01]
FIN5004W

Programme Convener:
Associate Professor V MacKenny

The Master of Fine Art is intended for those wishing to undertake advanced study in any studio work discipline or an interdisciplinary course of study approved by the School. Examination is by way of an exhibition (or an equivalent approved by the School) and appropriate documentation. This programme develops the ability to conduct independent research in an area of choice, with a methodology appropriate to the project. Students refine their proposal in consultation with supervisors during the first semester of study and expand this into a professional exhibition that demonstrates a sound understanding of a range of historical, theoretical and philosophical approaches to art. Theory and practice is seen as integral and the practical submission is accompanied by a 5 000 – 10 000-word explication, the form of which is dictated by the nature of the research project. The programme includes a weekly reading group in the first year, weekly seminars, annual progress reviews and a fieldtrip to a major contemporary exhibition.

Admission requirements:
(a) Faculty Rules FM3 apply.
(b) Programme requirements:
- An upper second-class pass in Fine Art IV.
- An upper second-class pass in an approved 3000-level Humanities course or an overall upper second class-pass in Theory and Practice of Art.
- A portfolio of recent work and a clear description of the proposed field of study.
- In exceptional circumstances, the attainment of a level of academic or professional competence which in the opinion of Senate, on the recommendation of the Board of the Faculty of Humanities, is adequate for the purpose of undertaking both the creative and theoretical aspects of the course, may qualify a candidate for admission.
(c) The deadline for receipt of these application materials is 31 October each year. Late applications may be considered at the discretion of the Director of the School.

Acceptance is on the recommendation of the Head of Department and is based on the assessment of the research proposal and portfolio of creative work and the availability of a suitable supervisor and studio space.

Duration of degree:
A candidate must be registered for the degree for at least two years.

NOTE: Studio space at the School will be made available to a registered MFA candidate for no longer than two years.

Programme requirements:
(a) A candidate must work under the supervision of a supervisor appointed by Senate.

(c) A candidate must submit his/her work for review during the third term of the first year of study. Re-registration is dependent upon the success of this review.
(d) A candidate must submit for exhibition under the auspices of the Michaelis School of Fine Art a body of his or her own creative work which makes an original contribution in
QUALIFICATION AND SPECIALISATION RULES AND CURRICULA FOR HONOURS AND MASTERS PROGRAMMES OF STUDY

Only two electives may be taken at HEQSF level 8.

Convener: Dr G Hull  
Politics Advisor: Professor A Seegers  
Economics Advisor: Professor J Burns

The PPE specialisation is an interdisciplinary specialisation incorporating courses and research in the three disciplines of Philosophy, Politics and Economics. Students entering the specialisation must identify their primary disciplinary focus in order to be placed in a home department. While all PPE students will complete at least one course in each of the disciplines, their research (Honours essay/project or Master’s minor dissertation) will be based in their home department, with registration and supervision complying with that department’s requirements.

General admission requirements:
For general admission into the specialisation, at both Honours and Master’s level, students must have successfully completed:

- A major, or its equivalent, in Philosophy, Politics or Economics,
- At least first year, defined as two semester courses at first year level in each of the other two disciplines (excluding the major).

Acceptance to the specialisation is at the discretion of the Convener and requires the recommendation of the Head of the Department in the home department selected by the applicant.

Admission requirements per home department:
In addition to the above requirements, there are additional, specific requirements per home department.

Minimum admission requirements for Economics as home department:

- For Honours: 65% average for ECO3020F and ECO3021S, with no course less than 60%. Acceptance is conditional on passing the pre-Maths and Stats course ECO4112F.
- For Master’s: An overall average result of not less than 65% must be achieved at Honours level.

Minimum admission requirements for Politics as home department:

- For Honours: 68% average for at least two senior Politics courses. See Political Studies section in the handbook for further details of criteria taken into consideration in admission.
- For Master’s: An overall average result of not less than 65% must be achieved at Honours level, plus a strong performance in the Honours research component.

Minimum admission requirements for Philosophy as a home department:

- For Honours: 70% average for the Philosophy major. Students who do not quite achieve this mark may be admitted to the specialisation at the discretion of the Head of Department.
- For Master’s: An overall average result of not less than 70% must be achieved at Honours level, plus a strong performance in the Honours research component. Students who do not quite achieve this mark may be admitted to the specialisation at the discretion of the Head of Department.

International Relations [POL03]

Programme Convener:
Associate Professor J Akokpari

Application and Admission requirements:

General application information - External candidates and UCT students must apply formally via Admissions. Candidates for the coursework degrees are required to submit a letter of motivation and sample of academic writing as part of their formal application. Candidates for the research degrees (by dissertation only) are encouraged to request a preliminary assessment with the department before submitting a formal application. The questionnaire is available on the Political Studies website.

Department admission criteria – Honours and Coursework Master’s:
Refer to faculty rules FH3 and FM3 for minimum admission criteria. Admission to the Department's specialisations is selective and highly competitive. The Department admits only those candidates that it judges are likely to complete the degree programme successfully. Criteria taken into consideration for admission include:

- academic excellence, indicated by good performance in previous studies;
- academic potential, indicated by improving performance into and across the final year of previous study; and
- political, policy or work experience where it is relevant to the specialisation for which a candidate seeks admission.

Additional admission criteria for applicants from UCT:

- Honours applicants who do not achieve a minimum of a 65% average in the third year of undergraduate studies at UCT are unlikely to be considered for admission. Conditional offers may be made subject to achieving satisfactory results in the final semester.
- Master’s applicants must obtain both a strong average for their honours coursework as well as a strong mark for the honours independent research project.
- Subject pre-requisites are listed separately under each specialisation description.

Additional admission criteria for non-UCT applicants:
The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Specialisation objectives:
International Relations at the University of Cape Town tries to strike a balance between International Relations as a field of study that evolved over centuries and International Relations as it is currently studied. International Relations as traditionally studied usually meant a focus on three concerns: war, diplomacy and trade. Now described respectively as conflict or security, diplomacy
and negotiation and the international political economy, these remain the central subjects we want to study. Our approach also values, however, the contributions of other sub-fields of Political Studies, especially Comparative Politics, and contributions from other disciplines. In International Relations scholarly debates, African cases and issues are crucial and, for this reason, graduates of our specialisation are often called upon to show their expertise in African and/or Southern African material.

Additional admission requirements:
Specific additional entry requirements for this specialisation are a past academic history in International Relations, Political Studies/Science or a strong academic background in a related discipline.

Students may select electives from list B or other electives appropriate to their programme and research interests, subject to approval by the Convener. List B options may not replace list A options.

For descriptions of courses refer to the listings at the end of departmental entries, as well as the course listings in other, relevant faculty handbooks.

### Justice and Transformation [POL06]

**Programme Convener:**

Dr H Scanlon

**Application and Admission requirements:**

**General application information** - External candidates and UCT students must apply formally via Admissions. Candidates for the coursework degrees are required to submit a letter of motivation and sample of academic writing as part of their formal application. Candidates for the research degrees (by dissertation only) are encouraged to request a preliminary assessment with the department before submitting a formal application. The questionnaire is available on the Political Studies website.

**Department admission criteria – Honours and Coursework Master’s:**

Refer to faculty rules FH3 and FM3 for minimum admission criteria.

Admission to the Department's specialisations is selective and highly competitive. The Department admits only those candidates that it judges are likely to complete the degree program successfully.

Criteria taken into consideration for admission include:

- academic excellence, indicated by good performance in previous studies;
- academic potential, indicated by improving performance into and across the final year of previous study; and
- political, policy or work experience where it is relevant to the specialisation for which a candidate seeks admission.

**Additional admission criteria for applicants from UCT:**

- Honours applicants who do not achieve a minimum of a 65% average in the third year of undergraduate studies at UCT are unlikely to be considered for admission. Conditional offers may be made subject to achieving satisfactory results in the final semester.
Master’s applicants must obtain both a strong average for their honours coursework as well as a strong mark for the honours independent research project.

Subject pre-requisites are listed separately under each specialisation description.

Additional admission criteria for non-UCT applicants:
The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Specialisation objectives:
The honours/master’s specialisation has been designed to locate current concerns and topical interests in justice and transformation in the more general perspectives of normative theory and comparative studies. It is inspired by the new directions in writing, research and teaching generated by the South African TRC-process but not confined to these. Instead, it links these new research interests and current debates in the area of transitional justice (including human rights law, conflict-resolution and peace-building, and social justice in transformation) with the more lasting intellectual perspectives provided by a thorough grounding in relevant academic disciplines.

Additional admission requirements:
Applicants should ideally have a major in, or some exposure to, Politics as an undergraduate subject. However, depending on which area of concentration the applicant is interested in, the following additional study backgrounds may be taken into account when assessing applications:

- **Transitional Justice**
  - Majors in Politics, History, Law, Philosophy, Sociology, Literature

- **Human Rights**
  - Senior courses in Law, LLB

- **Conflict Resolution**
  - Majors in Politics, Psychology, Law, Social Anthropology, Sociology

- **Social Justice in Transformation**
  - Majors in Politics, History, Law, Sociology, Social Anthropology, Psychology, Development Studies

The full specialisation comprises a minimum of 4 semester courses in each of the honours and master’s years plus an independent research project at honours level and a master’s minor dissertation component. The specialisation offers a choice between two core courses and a selection of electives in the areas of Transitional Justice, Human Rights, Conflict Resolution, and Social Justice in Transformation. Course selections are made with the following aims in mind:

1. **Transitional Justice**
   Courses in the area of Transitional Justice aim to provide a theoretical grounding and comparative understanding of the interdisciplinary field of Transitional Justice at the intersection of human rights discourses, democratic transitions and post-conflict reconciliation.

2. **Human Rights Law**
   Courses in the area of Human Rights Law aims to ground the professional and specialist studies in law in a broader theoretical and comparative understanding of the historical and political contexts in which Human Rights Law functions.

3. **Conflict Resolution**
   Courses in Conflict Resolution aim to provide a comparative understanding and practice-orientated introduction to current approaches to peace operations and post-conflict reconciliation in the African context.

4. **Social Justice in Transformation**
   Courses in Social Justice in Transformation are designed to combine a focus on issues of social justice related to poverty and development with the combating of legacies of racism and redressing racial, gender and social inequalities within more general normative and theoretical perspectives.

Some of the areas of concentration provide for Internships, which may be substituted for one of the elective options (but not for the core courses).

Criteria taken into consideration for admission include:
- academic excellence, indicated by good performance in previous studies;
- academic potential, indicated by improving performance into and across the final year of previous study; and
- political, policy or work experience where it is relevant to the specialisation for which a candidate seeks admission.

Additional admission criteria for applicants from UCT:
- Honours applicants who do not achieve a minimum of a 65% average in the third year of undergraduate studies at UCT are unlikely to be considered for admission. Conditional offers may be made subject to achieving satisfactory results in the final semester.
- Master’s applicants must obtain both a strong average for their honours coursework as well as a strong mark for the honours independent research project.
- Subject pre-requisites are listed separately under each specialisation description.

Additional admission criteria for non-UCT applicants:
The same criteria generally apply as for UCT applicants above. The requested supporting documentation (questionnaire, writing samples) must be supplied and is a determining factor in the assessment.

Objectives:
The honours and master’s specialisations in Politics are intended, broadly, to develop skills in political research, primarily in the study of national political processes. Students will learn how to use existing literature and theory to ask important research questions, identify appropriate evidence, and to apply relevant methods of analysis. The core courses focus on issues such as comparative politics, political institutions, political behaviour, public policy, democratisation, African and South African politics, and political theory. The degree comprises coursework and a research project or minor dissertation.

Additional admission requirements:
Specific additional entry requirements are a major in Political Studies or a strong academic background in a related discipline (e.g. Public Administration, Sociology, Psychology, Economics, Criminology, Law, History or Philosophy).

The Department of Religious Studies is committed to the study of religions which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:

- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;
- the creative and critical analysis of religion as a force in personal, social, economic and political life;

**Development Studies [SOC05]**

**Programme Convener:**
Dr J de Wet

**Admission requirements:**

(a) Faculty requirements are set out under Rules FH3 and FM3.

(b) Specialisation requirements:

(c) The following students will be considered for admission:

(i) Graduates with any majors or of specialisations within the social sciences. Besides Sociology, Industrial Sociology, Political Studies, Anthropology and Environmental and Geographical Science, these would include Economics, History and Religious Studies.

(ii) Students from other specialisations and degrees may be admitted at the discretion of the Convener and the Postgraduate Committee of Sociology. Any student may be required to take appropriate supplementary access courses. Selection into this specialisation is not automatic and is dependent on good second-class passes (i.e. at least 68%).

(d) Students are admitted either to the honours or the MPhil; admission to and completion of the honours does not imply automatic admission to the MPhil. Acceptance is not automatic and is at the recommendation of the Convener and the Postgraduate Committee.

**Objectives:**

This specialisation prepares students for entry primarily into the professional development community. This community straddles many spheres including community and non-governmental organisations, research organisations, agencies at various levels of government, media organisations and possibly corporate social responsibility offices. It is envisaged that MPhil (Development Studies) graduates will eventually take leading positions in this community; developing and disseminating knowledge about those sectors of society worst affected by socio-economic inequity, and devising strategies for them to gain access to resources and grow their capacity to optimise these resources.

Introduction
The development by human beings of the power to communicate with one another by means of language, and their subsequent and continuing co-operative use of that power in transforming the world they live in, are among the most significant determinants of the human condition. Scholars have been inquiring into the origins, history, mechanism, structure and social roles of language and languages since the very beginnings of the intellectual tradition. Courses in this section not only offer an introduction to the range of such inquiries and an opportunity to participate in them, but above all foster the idea that an attempt to grasp the nature of language is an indispensable part of any serious attempt to understand what it is to be human.

The African Gender Institute supports research and networking whose specific goal is the transformation of the political dynamics of gender and sexuality, within African contexts, as part and parcel of an overarching commitment to the economic, environmental, political, cultural, and social resilience and self-sustainability of continental communities. The AGI runs programmes in four areas: feminist processes and practices within e-technology, conflict and peace activism, sexual and reproductive rights, and gender and economic entrepreneurship. Each programme area runs projects which combine research with capacity-building, public intellectual debate, and resource development.

CENTRE FOR AFRICAN STUDIES

Professor and Director:
L Ntsebeza, A C Jordan Chair, BA(Hons) Cape Town MA KZN PhD Rhodes

Emeritus Professor:
B Cooper, MA Birmingham PhD Sussex
The Centre was constituted in 1976 and built on the work of the School of African Studies which had been in existence for over fifty years and was one of the oldest in the world. Current scholarship takes place within the context of the mission of CAS, which promote scholarship in the various fields concerned with people in Africa. The brief remains focused on providing a critical comparative perspective between Southern Africa, Africa, and the globalizing world. The mission remains urgent, given the longstanding and continuing dominance of Western models and discourses. The Centre houses research projects, organizes a range of seminars, conferences, and talks, and runs a gallery open to a wide variety of cultural performances.

**RESEARCH CHAIRS**

**Professor C Hamilton - Archive and Public Culture:**
Professor Hamilton was recruited to this position in view of the strategic significance of the country's archival estate for the national priority of developing social cohesion. The appointment was made in view of UCT's already significant investments and achievements, across a number of disciplines, in critical archival engagements, archive curation projects and collaborations with public culture institutions, including collaborations in heritage training carried out in partnership with the University of the Western Cape.
Contact details: Carolyn.Hamilton@uct.ac.za or 021 650 4506.

**Professor R Mesthrie - Migration, Language and Social Change:**
Professor Mesthrie was appointed to this position in view of the significance of Sociolinguistics in understanding heritage, culture and social change in a multilingual society. The chief focus of the research chair will be on migration, language and social change, examining sociolinguistic practices “from below” in relation to the fostering of multilingualism, the further intellectualisation of local languages and the continuing prestige of English. Professor Mesthrie will continue as President of the Linguistics Society of Southern Africa.
Contact details: rajend.mesthrie@uct.ac.za or 021 650 5236.

AXL4104F GENDER PEACE & JUSTICE
(Not offered in 2018)
24 NQF credits at HEQSF level 8
Convener: TBA
Course entry requirements: Acceptance for an honours programme.
Course outline: The development of peace-building initiatives in Africa has been mirrored by the expansion of various models of transitional justice. These encompass a range of judicial and non-judicial approaches adopted by post-conflict societies to address human rights abuses of the past such as war crimes tribunals and truth and reconciliation commissions. Despite increased attention by the international human rights community to the gender dimension of violations perpetrated during conflict, gendered experiences of conflict have generally received inadequate attention in transitional justice processes. Neglecting gendered patterns of abuse ultimately affects both women and men in their access to justice. This course will explore the evolution of transitional justice mechanisms in Africa and will analyse their successes and failure in addressing gender-based human rights violations.
DP requirements: None
Assessment: Two essays 60%; two response papers 20%; course participation 10%; group presentation 10%.

DP requirements: None.
Assessment: Two essays 60%; two response papers 20%; course participation 10%; group presentation 10%.

AXL4203F  PUBLIC CULTURE IN AFRICA  
(Not offered in 2018)  
24 NQF credits at HEQSF level 8  
Convener: TBA  
Course entry requirements: Acceptance for an honours programme.  
Course outline:  
This course explores issues in public culture affecting Africa in a global context. Detailed examples illustrate how public culture is shaped, and how public expressions of identity and difference manifest in spaces and buildings, heritage, music and literature. An interdisciplinary course, it introduces various theoretical perspectives on culture and uses evidence from archaeology, history, architecture, literature and cultural studies. Its empirical focus ranges from the archaeology of pre-colonial Africa to the public culture of the Internet. The course interweaves and links engagement with theory with the development of skills that are useful in the worlds of film and media practice, heritage practice, business, advertising etc. The theory component considers key texts demonstrating "tools to think with", and allowing shifts between general propositions and real-world examples, thereby probing the socio-cultural world’s underlying structures. The skills development component focuses on the conceptual planning and development of projects in the phase preceding final production. In particular, the course develops historically- and theoretically-informed, reflexive understandings of culture and identity, in contexts of diverse heritage and media practices. It offers a unique convergence of theory and practice, around a number of key sites of identity and contestation: "race", "public culture", "African-ness", and the like.  
DP requirements: Attendance at seminars is compulsory, failing which students’ papers may not be marked.  
Assessment: Two essays (25% each) 50%; major project 50%.

AXL4205S   THE AFRICAN STUDIES ARCHIVE  
(Not offered in 2018) 
24 NQF credits at HEQSF level 8  
Convener: TBA  
Course entry requirements: Acceptance for an honours programme.  
Course outline:  
In this course we take a look at some of the key collections in the Manuscripts and Archives division of the University of Cape Town Library, and at some of the bodies of scholarly work to which they have given rise. As one of the oldest university archives in Southern African the collections speak – in image and text – of the formation of a range of discipline-based knowledges dealing with Africa. On the one hand, this takes the form of the emergence, formatisation and institutionalisation of a range of collecting and recording practices, fieldwork methodologies and the like. On the other hand, it takes the form of the emergence of various disciplinary discourses and their associated “objects” and “fields”. The key source of insight in the course lies in exploring how these different objects and fields are not natural or given, but have been formed and constructed in relation to specific social contexts and intellectual histories. Significant collections examined in this course include the Bleek/Lloyd collection, the Goodwin Collection and the Hahn Collection. Particular emphasis is placed on the many hundreds of photographic images that form part of these collections as a point of entry into larger disciplinary debates and concerns. 
DP requirements: Attendance at seminars is compulsory, failing which students’ papers may not be marked. 
Assessment: Two essays (25% each) 50%; major project 50%. 

AXL4206S   DECOLONIAL THEORY  
24 NQF credits at HEQSF level 8  
Convener: TBA  
Course entry requirements: Acceptance for an honours programme.  
Course outline:  
This course considers the growing body of thought from Latin America under the heading ‘decolonial theory’, and exemplified in the works of Walter Mignolo, Arturo Escobar, Enrique Dussel, Santiago Castro-Gomez, Nelson Maldonado-Torres and Anibal Quijano. This work has been significant in framing an approach to questions of knowledge, coloniality and globalisation that attempts to re-write the script of modernity (as colonial modernity) and that provides rich conceptual resources through which to re-think familiar issues. The course takes a key-word approach. Each two-week block considers a distinct set of key words or concepts and texts that introduce and discuss them. They include Coloniality (of power/knowledge/being); Geopolitics of knowledge; Colonial globality and global designs; Border theory and colonial difference; Modernity (colonial modernity, peripheral modernity, transmodernity); Global designs and the local; The Indigenous Movement and postcolonial ethnicities. Approaching decolonial theory from the perspective of the Cape, the course asks: How might a critique based on South/Latin American historical experiences translate to African contexts? How does it speak to the particularity of knowledge production and colonial engagement in the Cape? How does it connect with contemporary African Studies debates addressing questions of knowledge and epistemology? 
DP requirements: Submission of all written work and attendance at all seminars. 
Assessment: One major project 100%.

<td>MEDICAL ANTHROPOLOGIES: WELL-BEING IN A PRECARIOUS WORLD</td>
<td>24</td>
<td>8</td>
<td>Professor F Ross</td>
<td>Acceptance for an honours programme.</td>
<td>The course explores the subdiscipline of medical anthropology through a range of theoretical perspectives on well-being in relation to the body, medicines, and political economy. The overall theme of the course concerns the intertwining of body, sociality and illness. It seeks to demonstrate the ways in which illness and well-being are imbricated in a precarious world. Theoretical themes in medical anthropology are discussed alongside ethnographic work to inspire students in the importance of a detailed revisiting of local worlds and their global connections. Four major themes are: Phenomenological approaches to embodiment; Questions of power; Marginalisation, history and discourse; Knowledge and ethics in relation to biology, science, and biomedicine. The overall aim is to examine how well-being is constituted and to understand the ways in which contemporary arrangements of power, knowledge, resources enable or inhibit health, broadly understood. The course examines the entailments of practical medical anthropology.</td>

<td>8</td>
<td>Associate Professor L Green</td>
<td>Acceptance for an honours programme.</td>
<td>This course focuses on the relationship between science and governance, drawing on current debates in science studies about the mediation of different versions of nature, truth and world in a democracy. Whether those concerns arise in relation to different disciplinary knowledges, the interests of capital, religious or indigenous movements, or between scientists and parliamentarians, the production of evidentiaries and procedures for verification are a central concern in decision-making in contemporary public life. The course explores the unstable knowledge terrain where state, science, publics and capital meet, with the goal of developing insight into the mistranslations and incomprehensions that occur, and to explore options that might resolve them. Building on emerging work on scholarly diplomacy in the scientific humanities, with a particular interest on science studies in the south, the course focuses on emerging strategies of mediation, equivocation, translation and contestation that are part of democratic processes and activism.</td>

<td>This course explores approaches to research which, while engaged with texts, imagine the creation of knowledge as a dynamic in which questions of space, ground, collectivities, language and the body intersect in difficult tensions of what can – and cannot – be represented within our own work as researchers. Drawing from the disciplinary and research interests of the course conveners, the course will look at contemporary theory on questions of ‘ground’ (actual ground sites of burial, dispossession, building, and memory, and the ‘ground’ of epistemological assumption), ‘identities’</td>

(those created through digital communication, those created through migration, those imagined through political coercion or consensus), and the ‘body’ (the technological body, the sexual body, the violated body, bodies of knowledge and creativity). Through the discussions opened by what will become an interdisciplinary conversation, we will ask questions about the methodological strategies which might help us imagine ‘research’ beyond the boundaries of qualitative approaches with we are already familiar.

**AXL5202F PROBLEMATISING THE STUDY OF AFRICA**
24 NQF credits at HEQSF level 9
**Convener:** Associate Professor H Garuba

**Course entry requirements:** Acceptance for a master’s programme.

**Course outline:**
The course looks at the relationship between power and knowledge, within the context of the history of Africa since colonialism and the development of the disciplines that study this continent. It is a relationship that helps to explain the links between colonialism and the formation of disciplines, between imperialism and language studies, in ways that not only cut across disciplines, but were in fact, responsible for formulating those disciplinary boundaries in the first place. The writings of intellectuals who have contributed to the formulation of our understanding of how and why
knowledge of the continent has developed and whose interests this knowledge has served, will be examined. The disciplines that will be interrogated are: history, gender studies, social anthropology and literary studies.

**AXL5204F  LAND & AGRARIAN QUESTION**

24 NQF credits at HEQSF level 9

**Convener:** Associate Professor H Chitonge and Professor L Ntsebeza

**Course entry requirements:** Acceptance for a master’s programme.

**Course outline:**
The prevalence of large-scale land acquisition in the context of rising food prices since the 2008/09 financial and economic crisis has brought the issues of land and land use in Africa in the spotlight. As a result, land and agrarian matters in Africa are increasingly having a direct bearing on broader issues including food security, environmental sustainability, economic growth, social and political stability, social justice and rural livelihoods. By introducing the land and agrarian questions in Africa this course critically examines the different dimensions of land, including patterns of land ownership, types of land tenure, land reform types, issues of tenure security, means of accessing land, land administration structures and institutions forms of land use, and the challenges (and opportunities?) posed by the current large-scale land acquisitions in different African communities. The course will draw examples from selected countries on the African continent. This course examines these dimensions of the land and agrarian questions in Africa in both their historical and contemporary contexts.

how Africans have responded to these theories. The course examines the question of whether African countries need to rethink these approaches and theories. Emerging views about Africa's development trajectory are also discussed. Critical questions about whether Africa can achieve sustainable economic growth and development by deploying conventional development and economic growth theory are discussed.

**AXL5206F PAN-AFRICANISM & REGIONAL INTEGRATION IN AFRICA**
24 NQF credits at HEQSF level 9

**Convener:** Associate Professor H Chitonge

**Course entry requirements:** Acceptance for a master’s programme.

**Course outline:**
The course examines the political and economic theory and rationale for Pan-Africanism and regional integration, with particular focus on how this has played out on the African continent over time. Emphasis in the course is on understanding the origins of Pan-Africanism, the current initiatives and arrangements towards regional integration, and the link between the two. The course provides an overview of past and contemporary strategies, initiatives and programmes aimed at unifying the continent. Students are introduced to the key challenges and opportunities of integration and development in Africa. While the philosophy of Pan-Africanism is still cited in some quarters as the basis for regional integration today, economic, and to a lesser extent political rationale, has dominated the motive behind regional integration. There is more emphasis now on the economic gains that can come from integrating the African continent than on any other motives. Given this context the course examines whether Pan-Africanism plays any role in the current drive towards regional integration. In the course, students are encouraged to critically reflect on whether the current motives for regional integration are strong enough to overcome the tendency toward national sovereignty and individualism in the continent.

**DP requirements:** Submission of all written work and attendance at all seminars.

**Assessment:** Seminar presentations & participation 15%, short essay 35% (3000 words), long essay (5000 words) 50%.

24 NQF credits at HEQSF level 9

**Convener:** Associate Professor S Levine

**Course entry requirements:** Acceptance for a master’s programme.

Four major themes are: Phenomenological approaches to embodiment; Questions of power; Marginalisation, history and discourse; Knowledge and ethics in relation to biology, science, and biomedicine. **AXL5414S RESEARCHING THE ANTHROPOCENE**
24 NQF credits at HEQSF level 9
**Convener:** Associate Professor L Green
**Course entry requirements:** Acceptance into an honours or master’s programme.
**Course outline:**
The term “anthropocene”, taken up by geologists to describe the era in which the effects of collective human action have become “significant on the scale of Earth history”, compels a rethinking of the divides between the human sciences and the natural sciences. The implication: not only are conceptual divisions between society and nature to be rethought, but that new approaches to research are needed to speak to the challenges of comprehending the interconnections of human life, earth systems, and species. This course offers an introduction to research methods that are needed in order to bring these interconnectivities and parts and wholes, into public life and decision-making. Building on current conversations across the south on the engagement of decolonial literatures and the post-humanities, this course explores the research methods proposed by leading scholars in these fields.
**DP requirements:** Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.
**Assessment:** Two 5000 word essays (40% each); prepared seminar presentation (20%).

**AXL5416F SCIENCE; NATURE; DEMOCRACY**
24 NQF credits at HEQSF level 9
**Convener:** Associate Professor L Green
**Course entry requirements:** Acceptance into an honours or master’s programme.
**Course outline:**
This course focuses on the relationship between science and governance, drawing on current debates in science studies about the mediation of different versions of nature, truth and world in a democracy. Whether those concerns arise in relation to different disciplinary knowledges, the interests of capital, religious or indigenous movements, or between scientists and parliamentarians, the production of evidentiaries and procedures for verification are a central concern in decision-making in contemporary public life. The course explores the unstable knowledge terrain where state, science, publics and capital meet, with the goal of developing insight into the mistranslations and incomprehensions that occur, and to explore options that might resolve them. Building on emerging work on scholarly diplomacy in the scientific humanities, with a particular interest on science studies in the south, the course focuses on emerging strategies of mediation, equivocation, translation and contestation that are part of democratic processes and activism.
**DP requirements:** Submission of all prescribed assignments; satisfactory attendance and participation in coursework seminars.
**Assessment:** Two 5000 word essays (40% each); prepared seminar presentation (20%)

ECO4026S  THE ECONOMY & ITS FINANCIAL MARKETS
14 NQF credits at HEQSF level 8
Convener: K Eyal
Course entry requirements: ECO4006F, ECO4007F and ECO4016F for Economic Honours students. PPE (and other) students who do not have to complete the core as part of their degree requirements may be granted permission to register for this elective at the discretion of the Head of Department.
Course outline:
This course is designed to help students appreciate the relationship between the economy and its financial markets so that they may better understand how the economy works, how financial markets behave and how they work and interact with each other. The programme is aimed at developing a feel for the rationality of ‘the market’ and the often discordant sounds and rhythms of financial markets. We hope to develop a stronger sense of how the financial market anticipate and influence economic policy. We will interact with the data on the economy and the markets using Eviews with which students should be familiar. We will use regression analysis and other econometric techniques to build and analyse models of the economy and the financial markets. As a result students will be expected to become more perceptive analysts of published financial data and economic events and of the role played by financial markets in promoting economic development.
Lecture times: Friday: 14h00 – 17h45
DP requirements: None.
Assessment: Coursework 50%; examination 50%.

Course outline:
“The Economics of AIDS in Sub-Saharan Africa” is designed as a master’s level course for graduate students in economics. It focuses on the economic and welfare implications of the AIDS epidemic and policy responses to it. The recent international effort to ‘roll-out’ antiretroviral treatment in developing countries is a major focus of the course. In addition to economic analysis, the course also requires students to obtain a working knowledge of international best practice demographic modelling, and to understand the social and political dimensions of the AIDS epidemic in Africa. The South African case is examined in some detail, but expressly within the context of Southern
Africa. The course requires students to absorb a wide-range of interdisciplinary readings. The course is examined through a process of continuous assessment. Students are required to write a long essay and five short essays, one of which entails a critical evaluation of demographic modelling.

Convener: M Sarr

**Course entry requirements:** An undergraduate major in Economics and Honours degree or equivalent in a relevant discipline. Students not registered for an Economics Masters programme will need permission from the graduate convenor.

**Course outline:**

This course explores key themes in development economics focusing on the relationship between state and market, governance and growth. It traces the origins of development economics as ‘colonial’ economics, paying particular attention to the contribution made by Arthur Lewis with regard to labour-intensive industrialisation and the role of savings in generating growth. We trace the evolution of the ‘development doctrine’ over the second half of the twentieth century, drawing connections between the evolving economic context and policy responses. We discuss the emergence of the ‘good governance’ agenda as part of the Washington Consensus about structural adjustment paying close attention to criticisms from scholars in other disciplines about development as an ‘anti-politics’ machine. Such concerns about governance and governmentality have shaped contemporary ‘going with the grain’ strategies in development and renewed focus on micro-level initiatives. One of the boldest micro-level initiatives in recent development history is the Millennium Development Village initiative. We consider this history in the light of evolving development economic theories about poverty traps and the Millennium Development Goal (MDG) project (2000-2015). The final part of the course focusses on the Sustainable Development Goals, asking to what extent these are an improvement on the MDGs, and the extent to which environmental challenges shape the development agenda today.

ECO5074S  RESEARCH & POLICY TOOLS: DEVELOPMENT IMPACT AND EVALUATION
30 NQF credits at HEQSF level 9
Convener: A Black
Course entry requirements: An undergraduate major in Economics and an Honours degree or equivalent in a relevant discipline. Students not registered for an Economics Masters programme will need permission from the graduate convenor.
Course outline:
This course aims to equip students working on development problems with conceptual tools for evaluating development projects and interventions. The objectives of particular projects or policy interventions vary and hence there is no single measurement tool applicable to all. Development is multi-dimensional, with some objectives more closely aligned to human rights perspectives, and others more amenable to narrow economic cost-benefit calculations. Since donor resources and government spending are both subject to budget constraints, understanding the economic consequences of development choices is essential, hence this course pays particular attention to cost benefit analysis and assessing productivity/efficiency. However, the key objective of the course is to
introduce students to the profoundly problem-driven nature of developmental impact assessment where the important first stage involves framing the question and then determining the most appropriate assessment tool.

**Convener:** M Sarr

**Course entry requirements:** Honours in Economics or equivalent or at the discretion of the Head of Department. Students not registered for an Economics Masters programme will need permission from the graduate convenor.
Course outline:
The objective of this course is to introduce recent quantitative techniques which are used to empirically implement and test models of consumer behaviour and competition between firms. These models are commonly applied to competition policy and regulatory proceedings, for instance to assess the effects of a merger on competition or to regulate telecommunication operators. During the course students should become comfortable with the application of these techniques and understand their limitations. This course should be of interest for students who intend to work as economists at antitrust authorities, industry regulators, and economic consulting firms or pursue a career as a researcher in academia.

The course will be divided into two interchanging parts. First, we will derive theoretical models in the classroom. Next, we will estimate these models using Stata and real data from different industries in the computer lab. About 50% of the course will be devoted to lab exercises. You will also receive regular take home computer exercises to be able to practice the applications by yourself. Lectures notes and a reading list of relevant academic and policy papers will be provided for each topic. The following topics will be covered in the class: (1) Econometric methods for estimation of simultaneous equations models of demand and supply (2) Estimation of oligopolistic models of competition and tests for market conduct (3) Estimation of differentiated products demand functions (4) Merger simulation (5) Detecting collusion and estimation of damages (6) Estimation of models of market entry (8) Quantitative methods used to define markets in antitrust proceedings

The study of curriculum is the study of how dominant groups in society select and codify the knowledge they consider to be important for children to learn, the decisions that are made about how this knowledge is taught, and how it is assessed. The course focuses on issues of curriculum, pedagogy and assessment directly, as well as more broadly on the issue of social inequality and how this is reproduced or challenged through education. The course engages with a range of texts from sociological and educational literature, introducing students to major debates in curriculum studies. It moves from a macro focus on education and society to micro studies of curriculum, classroom pedagogy and assessment. 30 NQF credits at HEQSF level 8
Convener: Associate Professor C McKinney TBA
Course entry requirements: Admission to BEdHons or PGDip (Education).
Co-requisites: None
Course outline:
The course aims to develop students’ understanding of the language and literacy challenges in South African schooling; to develop students’ knowledge of conceptual resources for analysing and intervening in these challenges.
This course explores key challenges in the field of language and literacy in schooling in South Africa. We focus on the complex possible relationships between language and failure in South African schooling from socio-political, socio-cultural and sociolinguistic perspectives. We examine the language of learning and teaching debate and the theoretical and empirical work underpinning this as well as the language policy and sociolinguistic context in South African education. In a second focus on literacy, we study writing and reading in education, developing the resources for understanding and intervening in key challenges around literacy in educational settings. We study literacy as sets of socially organised practices and skills and examine how aspects of social and linguistic diversity impact on the learning, teaching and assessing of the skills and practices associated with language, reading, writing and learning in education. We further explore dominant approaches to the teaching of literacy, analysing how reading and writing are conceptualised in these approaches.

EDN5504S  THEORISING EDUCATION POLICY
(Not offered in 2018)
30 NQF credits at HEQSF level 9
Convener: Associate Professor L Cooper
Course entry requirements: Acceptance for the MEd.
Course outline:
The course sets up a series of conceptual lenses though which to interrogate policy developments in adult education, higher education and vocational education and training. The first is the division of mental and manual labour in society which leads to institutional, programme and knowledge differentiation and differing prospects of social inclusion or exclusion. The second is the relation between education, the economy and the state which has implications for various modes of policy legitimisation. Policy proposals that relate to students’ work and interest are then analysed in terms of their ideological and educational intent and realisation.
DP requirements: 80% attendance record and completion of all tasks and assignments.
Assessment: 8000 word essay or equivalent.
EDN5505S  CHANGING FRAMEWORKS IN CURRICULUM POLICY
30 NQF credits at HEQSF level 9
Convener: Associate Professor U Hoadley
Course entry requirements: Acceptance for the MEd.
Course outline:
The course is concerned with change and continuity in processes of curriculum reform. Three central ideas informing it. The first is an historical analysis of curriculum identifying reform swings between two poles, ‘traditional’ and ‘reform’ or progressive curricula. The second idea is the implications of these swings the ‘message systems’ of education – curriculum, pedagogy and evaluation (the intended, the enacted and the assessed curriculum). The third tenet is the centrality of knowledge in the consideration of curriculum policy, change and evaluation. The course begins with a broad scan of the political sociology and historical literature on curriculum and throughout it focuses on analyses within the sociology of knowledge. Fundamentally it is the nature and status of knowledge that shifts when the curriculum changes. The course aims to expose students both to the broader political context and processes of curriculum reform, as well as conceptual approaches to the analysis of curriculum forms.
DP requirements: 80% attendance record and completion of all tasks and assignments.
Assessment: Academic essay (8000 words).

EDN5506F  PEDAGOGY, KNOWLEDGE & SOCIETY
30 NQF credits at HEQSF level 9
Convener: Associate Professor U Hoadley
Course entry requirements: Acceptance for the MEd.
Course outline:
The course privileges the notion of curriculum as a selection and organisation of knowledge for transmission. Being sociologically rooted, it also concerns the differential distribution of knowledge and its transmission across groups in society. Central to the course are questions of what knowledge is included in the formal curriculum, how it is organised and what the implications of this are for groups of learners. Basil Bernstein provides the main theoretical resource for these issues, from an investigation of curriculum forms and pedagogic modalities to an analysis of how knowledge is transformed for pedagogic communication, through to his theorisation of different knowledge structures. Exemplars of empirical work that address the questions of the course are considered throughout. Attention will be drawn to the development of languages of description. In short, the course focuses on the relationship between schooling and society and research that has pursued questions around it within a particular theoretical tradition.
DP requirements: 80% attendance record and completion of all tasks and assignments.
Assessment: Academic essay (8000 words).

**EDN5520S  ACADEMIC LITERACIES**
30 NQF credits at HEQSF level 9

**Convener**: Dr A Bangeni

**Course entry requirements**: Acceptance for the MEd

**Course outline**: The course provides an introduction to the study of language and literacy in a range of academic settings, via the emerging area of ‘academic literacies’ in the New Literacy Studies field. Rather than a generic academic skill, academic literacy is studied as diverse, shaped by disciplines and subject areas. The course engages with two methodologies that shed light on academic texts and practices. Critical discourse analysis (CDA) focuses on texts, while ethnographic observation (including multimodal analysis) looks more closely at practices. These methodologies are used to explore the relationship between texts and their social-political-historical contexts. The course interrogates the politics of ‘academic voice’ to help us think about access questions in tertiary education settings locally and globally.

**EDN5529F LEARNING SCIENCE EDUCATION & TEACHING**
30 NQF credits at HEQSF level 9
Convener: Associate Professor R Laugksch
Course entry requirements: Acceptance for the MEd.
Course outline:
Considerations for learning in science education and implications for teaching. The course aims to provide students with a conceptual framework for critically examining their own understandings of learning and how such understandings influence the design of curricula as well as the implementation of teaching strategies in students’ own classroom/school contexts. Topics explored include the role and purpose of natural science in South-Africa (and elsewhere); conceptual change; a critical examination of constructivism and its application in high and low socio-economic-status learning environments. EDN5531F  THEORIES OF CHILD & CHILDHOOD
30 NQF credits at HEQSF level 9
Convener: Professor K Murris
Course entry requirements: Acceptance for an MEd programme.
Co-requisites: None
Course outline:
This course will draw on psychology, sociology and mainly philosophy of childhood to explore key issues in early childhood and primary education. Our main focus will be on tracing how various theories influence and justify certain educational practices, also in the global south. Shifting conceptions of child and childhood influence relationships between adult and child and through the use of various media (including picturebooks, film and documentaries) we will be exploring how child is positioned (and marginalised) in various approaches to teaching and learning. Our journey will meander from religious thinkers and philosophers on views of child to philosophers such as Plato, Aristotle, Locke and Rousseau. They in turn, heavily influenced Darwin, Piaget, Vygotsky, Malaguzzi, Barad, Deleuze and Guattari. Our mapping will focus on the decolonisation of childhood discourses through a disruption of the following seven material-discursive constructions: child as ‘innocent’, ‘evil’, ‘ignorant’, ‘developing’, ‘fragile’, ‘communal’ and ‘competent’. The course includes investigating the implications of the posthuman orientation for teaching and learning, as well as research design, methodology and research ethics.
DP requirements: 80% attendance record and completion of all journal tasks and final artwork.
Assessment: Diffractive journal and art installation (100%).

ELL4035S STUDIES IN THE MODERN NOVEL
(Not offered in 2018)
24 NQF credits at HEQSF level 8
Convener: TBA
Course entry requirements: Acceptance for an honours programme.
Course outline:
This course will give students an overview of the twentieth-century novel by pursuing the theme of travel. The study of travel narratives has become a central field of literary criticism over the past three decades, closely paralleling the rise of critical theory and postcolonial criticism, since travel involves intercultural encounters and the exploration of alternative models of selfhood. The focus will be in particular upon American novels, asking whether American travel narratives differ significantly from European ones. American writers often have a dual consciousness, since they are both imperialistic, and members of a postcolonial nation.
DP requirements: Submission of all written work and at least 75% of seminar attendance.
Assessment: Class participation (including reading test): 10%. One researched class presentation: 10%. Accompanying essay (3,000 words): 30%. One research essay (5,000 words): 50%.

ELL4036F SPACE, PLACE & LIT NON-FICTION IN AFRICA
24 NQF credits at HEQSF level 8
Convener: Dr H Twidle
Course entry requirements: Acceptance for an honours programme.
Course outline:
In this course we will read an array of acclaimed texts from contemporary South Africa which can be loosely grouped under the label ‘literary non-fiction.’ From 2015 the special topic of the course will be Land, Space and Place, as we investigate how such concepts have been constructed and questioned in a variety of non-fictional genres: investigative journalism, the diary, life-writing, oral history, public science writing, archival reconstruction and urban studies. Reading works by writers like Sol Plaatje, Jacob Dlamini, Noni Jabavu, Antjie Krog, Njabulo Ndebele, Jonny Steinberg, Charles van Onselen and Ivan Vladislavic, we will address questions of landscape; the farm novel; oral history as it intersects with environmental history; discourses of scientific enquiry at the Cape of Good Hope; ‘wild’ cities; ‘native nostalgia’ and the spaces of childhood in the South African memoir; the post-apartheid urban imaginary; the urban edge and the littoral zone as these play out in compelling non-fiction narratives which seek to understand what a sense of place might mean in such a spatially distorted society. At the same time, we will place these local texts in dialogue with similar, environmentally inflected works from the rest of the world.
DP requirements: Submission of all written work and at least 75% of seminar attendance.
Assessment: Attendance, participation and one class presentation (20%). Research exercises (10%). One research essay of – 3,000-4,000 words (40%). One review essay of – 2,000-2,500 words (30%).

**ELL4069S EARLY MODERN LITERATURE**  
*(Not offered in 2018)*  
24 NQF credits at HEQSF level 8  
**Convener:** Associate Professor S Young  
**Course entry requirements:** Acceptance for an honours programme.  
**Course outline:**  
This seminar seeks to shift the lines of inquiry into Shakespeare’s on-going cultural life across the global South by examining histories, scholarship, performance and adaptations of Shakespeare and his contemporaries within Africa, the Caribbean, the Indian Ocean, Latin America and North America. We will consider what happens when early modern drama travels to locations beyond England and how these works are transformed by these encounters. We will examine how Shakespeare and his contemporaries represent southern locations, specifically Africa, India, and Indonesia, just as England becomes engaged with the complex network of overseas trade spanning the globe. We will remain attuned to our own location and that of our material, in the hope of generating new perspectives on Shakespeare’s cultural life across the global South and extending the familiar paradigms of postcolonial studies.  
**DP requirements:** Submission of all written work and at least 75% of seminar attendance.  
**Assessment:** Assessment is based on three kinds of assignments: (1) Two written reflections in response to question sheets, each 1,000 words (total 25%) (2) Two written analyses of historical documents pertinent to the study of overseas trade in the early modern period (total 25%) (3) An independently researched final essay of 4,000 words (50%).

Other pairings will include: John Locke and William Wordsworth on the association of ideas; Kant and Lyotard on the sublime; Zola, Breton and Lukács on realism and surrealism; Freud and Wittgenstein on dream interpretation; and Godard and Adorno on montage.

**ELL4074S CURRENTS OF THOUGHT IN AFRICAN LITERATURE**  
24 NQF credits at HEQSF level 8  
**Convener:** TBA  
**Course entry requirements:** Acceptance for an honours programme.  
**Course outline:**  
The term ‘diaspora’ emerged as the term of reference for those peoples of African descent resident outside of Africa in the 1950s as most of Europe’s colonies hurtled toward nation formation. Widely used to identify the survivors of the transatlantic slave trade and their descendants, diaspora, in the case of Africa, came to signal both the connection to Africa and the impermeable difference between those remade by slavery in the ‘New World’ and those who endured colonialism on the continent. This course grapples with the term as one in crisis and instability, constituted and reconstituted not only in relation to yearnings for home(land) but also empire. We will trouble some of the narratives we tell about African and African diasporic literary traditions in relation to empire and nation. Some of these traditions will include, but are not limited to: Ethiopianism, the Harlem Renaissance, Negritude, and Pan-Africanism. We will read slave narratives, novels, poetry, short stories, as well as polemical and theoretical texts.
**ELL5000S**  RESEARCH METHODS: PROBLEMS IN TEXTUALITY  
24 NQF credits at HEQSF level 9  
Convener: Professor J Higgins

Course outline:  
In this seminar, we will examine a range of contemporary writings, both fiction and non-fiction, from different geographic locations and regions across the globe that examine and depict uprisings, revolts and protests, such as the Arab Spring, the Occupy Wall Street movement, Madrid’s ‘los indignos’, the service delivery protests in South Africa and beyond. At stake in an analysis of all these texts: how to imagine a new social order.  
DP requirements: Submission of all written work and at least 75% of seminar attendance.  
Assessment: Three question sheets (50%); one essay of 3,000 to 4,000 words (50%). A draft of the essay will need to be presented at an in-class seminar workshop.

**ELL5030F**  LANGUAGE, LITERATURE & MODERNITY I  
24 NQF credits at HEQSF level 9  
Convener: Associate Professor H Garuba and Dr K Mkhize  
Course entry requirements: Acceptance for a master’s programme.  
Course outline:  
The course is divided in two parts.  
1) Issues of modernity and postcoloniality. This section focuses on the self-constitution of Modernity and its Other, constructed in binary relations, such as the pre-modern, the traditional, the primitive and so on. The course explores this through the categories of Reason and Subjectivity, Time and Space, and the Normative Body and then examines the relationship between modernity, colonialism and post colonialism. This section covers the first phase of post-independence.  
2) Migration, gender and globalisation. We reflect on what diaspora offers to a conceptualisation of Africa and consider how it complicates the dichotomy of ‘home’ versus ‘elsewhere’. How does an Africa that is ‘everywhere’ help us to rethink the familiar categories of cultural studies and how might this ‘Africa’ extend the framework of postcolonialism? We begin by examining some key theoretical texts on race, migration and gendered relations of power. In turning to the novels, we consider how diasporic writing both invokes and complicates familiar categories of identification and the systems of thought associated with ‘modernity’.  
In both sections of the course we will examine critical readings in order to develop conceptual tools for reading primary texts by African writers.

ELL5031S  LANGUAGE, LITERATURE & MODERNITY II
24 NQF credits at HEQSF level 9
Convener: TBA
Course entry requirements: Acceptance for a master’s programme.
Course outline:
This course contemplates ‘Revolutionary Modernities’ by examining the points of intersection and divergence, between continental and diasporic African intellectuals. In his seminal 1938 text, The Black Jacobins, C. L. R. James argued that the plantation is the first instantiation of modernity and the Haitian Revolution the fullest realisation of democracy. It is often forgotten that The Black Jacobins was written as one possible vision of anti-colonial resistance in Africa. James was one of several black writers, thinkers and intellectuals whose work engaged with the economic, political and cultural circuits of western modernity and its operations in the African continent and its diasporas.
DP requirements: Submission of all written work and at least 75% of seminar attendance.
Assessment: Two essays of between 4,000 and 5,000 words each, each worth 50% of the final mark. Attendance at seminars is compulsory, failing which students’ papers may not be marked.

ELL5040S  THEORIES OF REPRESENTATION
(Not offered in 2018)
24 NQF credits at HEQSF level 9
Convener: Associate Professor S Young
Course entry requirements: Acceptance for a master’s programme.
Course outline:
This course investigates the ways in which language comes up against limits when attempting to represent trauma or ‘unspeakable’ pain. Trauma theorists are occupied with the paradoxical ways in which traumatic experiences seem to defy representation, while simultaneously calling for testimony, telling and story. We will read some of the literature that wrestles with this paradox, both fiction and non-fiction, and will reflect critically on the idea that testimonial literature – literature that bears witness to trauma – facilitates ‘healing’, specifically in relation to Holocaust, Apartheid and slave narratives.
DP requirements: Submission of all written work and at least 75% of seminar attendance.
Assessment: 4 written reflections in response to question sheets, each 1,000 words, total 50%; final essay (3,000-4,000 words) 50%.

ELL5042F  EARTH; ECOLOGY; HUMANITIES
26 NQF credits at HEQSF level 9
Convener: Dr H Twidle
Course entry requirements: Acceptance for the MPhil in Environmental Humanities.
Course outline:
The environmental humanities is the term for a dynamic and growing field in universities across the world, one promoting interdisciplinary scholarship that explores how we understand the relations between humans and the environment in all areas of cultural production. It ranges from social justice movements to the creative arts, from questions of scientific modelling to the language of government policy. In this course, we will ask how a critical, politically aware environmental consciousness of the South might be brought forth in the public sphere. What, after all, do we mean when we speak of the environment? This seminar considers the rich and difficult terrain where questions of ecological thought and environmental science interact with the humanities: with sociology, anthropology, history, imaginative writing, film, critical theory and the creative arts. This is a co-taught course, with modules including but not limited to: Environmentalism, public science writing and narrative non-fiction; Slow violence, development and the challenge of deep time; Imagining the deep ocean; The militarisation of conservation; The commons debate; Landscape and the gaze; Visual art from Arcadia to Apocalypse; Art and extinction; Capitalism in the web of life; Carbon democracy questions of infrastructure; The political economy of food in the global South; Petro-cultures and the oil encounter in West Africa; Extraction and the poetics of resistance; Film and environment in a new age; Environmental narrative and the media.
DP requirements: DP requirements: Submission of all written work and at least 75% of seminar attendance. Assessment: 1. A reflective essay 2000-2500 words (30%). 2. Research-based essay: 3500-4500 words (40%). 3. Portfolio of weekly writing exercises, drafts and journal entries (30%).
Postgraduate courses and ancillary activities
In addition to formal courses, students undertaking postgraduate courses are required to participate fully in other departmental activities of an academic nature. Such activities are regular seminars on environmental topics addressed by persons prominent in their fields, field camps and field exercises away from Cape Town, and study tours to obtain first-hand exposure to environmental problems and their solution. Graduate students who, in the opinion of the Head of Department, have not had adequate exposure to undergraduate courses with environmental content may also be required to attend specified courses.

**EGS4047S  POLICY AND GOVERNANCE**
30 NQF credits at HEQSF level 8

**Convener:** Dr Z Patel

**Course entry requirements:** Acceptance for Honours or Master’s specialising in EGS.

**Course outline:**
This course looks at the underlying dynamics involved in the negotiation of environmental policy and its implementation. The assumption here is that unsustainable outcomes are not a result of a lack of will or intention, but rather due to vastly varying values, knowledge and data that are brought to bear on decision making for the environment. The approach of this course is to challenge the ‘cultural embeddedness’ of policy i.e. it critiques the cultural processes underlying environmental policy. A deeper understanding of the cultural politics of environmental policy and practice will deal with the processes through which institutions define and mediate policy outcomes; governance arrangements for sustainable development; the roles of power, rationality, knowledge and values in achieving environmental and social justice.

**DP requirements:** At least 80% attendance record and submission of all assignments.

**Assessment:** Assignments 50%; examination 50%.

FAM4036S  FILM AND ENVIRONMENT
(Not offered in 2018)
24 NQF credits at HEQSF level 8
Convener: Dr I-M Rijsdijk
Course entry requirements: Acceptance for an honours programme.

Course outline:
This course examines several debates concerning the representation of the natural environment in narrative fiction and documentary film. Taking the ecocritical debate that has grown in scope and intensity in literary criticism since the early 1980s as a departure point, the course will investigate the value of this discourse and its applicability to films that either explicitly or implicitly use the natural environment as a key component of the film narrative. Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterise the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western, for example), as well as the representation of people in relation to the nonhuman environment in environmental documentary. The course includes a practical exercise in which students will produce a visual artefact that applies the idea of the course to local situations.

DP requirements: Attendance at all classes; punctual submission of written work.

Assessment: Seminar presentation 10%; long paper (4,000 words) 40%; visual project 50%.

DP requirements: Attendance at all classes; punctual submission of all written work.

Assessment: One class presentation of 2,000 words (20%); two essays of 4,000 words each (40% each).

FAM4038F  AUTHORSHIP IN CINEMA
24 NQF credits at HEQSF level 8
Convener: Associate Professor M Botha
Course entry requirements: Acceptance for an honours programme.

Course outline:
The course will comprise an in-depth discussion on authorship and the great auteurs in film history such as Ingmar Bergman, Andrei Tarkovsky, Federico Fellini, Michelangelo Antonioni, Theo Angelopoulos, among others. We shall engage with this material through detailed formal analysis as well as through an exploration of central debates around auteurism from the 1950s until the present. Authors in, mostly, European cinema will serve as case studies, taking a cue from various scholars (e.g. Cook, Maule) that the film author is not only the most important symbol of European cinema’s cultural tradition and commitment, but also a crucial part of Europe’s efforts to develop its cinema within domestic and international film industries.

DP requirements: Attendance at all consultations; punctual submission of all written work.

Assessment: One seminar presentation (20%); 2,500-word essay (30%); 5,000-word essay (50%).

FAM4041S MEDIA AND THE PUBLIC DOMAIN
24 NQF credits at HEQSF level 8
Convener: Professor A Haupt
Course entry requirements: Acceptance for an honours programme.
Course outline:
The key point of departure for Media & the Public Domain is that free speech rights in a democracy can be undermined by two nemeses. On the one hand, too much state control of the media can stifle the free circulation of information and, thereby, impoverish the public domain. On the other hand, too much corporate control of the media can impede the unfettered flow of information and, thereby, limit citizens’ ability to make informed decisions about the common good. This course pays particular attention to the ways in which corporate interests influence approaches to intellectual property and key changes in technology, often at the expense of the public interest. Media & the Public Domain explores debates about copyright, cultural appropriation and access to knowledge in relation to newer technologies like p2p platforms (e.g. Napster and Kazaa), social media platforms (Facebook, Twitter and YouTube) as well as the non-commercial sharing of cracked software, games, films and music. The specific focus of the course will be on the music and film industries’ responses to what it terms “piracy” of its intellectual property in the digital age.
DP requirements: Class attendance and timeous completion of all assignments. A DP warning will be issued if students miss two seminars without satisfactory explanation (e.g. medical certificates). Students will be denied a DP certificate if they then miss a third seminar.

Course entry requirements: Acceptance for a master’s programme.
Course outline:
The convergence of media, information and communication technologies (ICT) and the growth of global networks and relatively affordable mobile communication systems have been associated with dramatic shifts in society. FAM5040S CONCEPTUALISING SA CINEMA
(Not offered in 2018)
24 NQF credits at HEQSF level 9
Convener: Associate Professor M P Botha
Course entry requirements: Acceptance for a master’s programme
Course outline:
Although filmmaking in South Africa has a history dating back more than a century and although the issues it raises are formidably complex, the field is still wide open for scholars. In this course,
we aim to explore ways of examining fiction and documentary filmmaking in South Africa through the lens offered by a range of leading theorists of the last fifty years. While we shall give attention to the scholarly work that has gone before—the pioneering work of, notably, Thelma Gutsche, Keyan Tomaselli, Martin Botha and, more recently, Jacqueline Maingard and Lucia Saks—students will be challenged to find new ways of reading South African film, both past and contemporary. Students will also be strongly encouraged to make use of the outstanding archival resources in UCT’s library to generate new research subjects, new ways of focusing interpretive approaches to them and new ways of constructing the canon of South African film.

**DP requirements:** Attendance at all classes; punctual submission of written work.

**Assessment:** One seminar presentation of 2,000 words 10%; two 6,000-word essays 45% each.

Students will be expected to engage not only with the challenge of writing for the medium of television instead of film, but with the demands of writing for the longer format. As with the course on writing for film, their understanding of genre will extend beyond merely grasping the formula to exploring how to produce innovative and genre-bending scripts that engage with deeper issues of human experience, taking special note of the intimacy, immediacy and affect of the televisual medium. Their writing will be informed by the examination of theories of screenwriting and storytelling and the exposure to, and analysis of, a range of televiusal examples.

**DP requirements:** Attendance at all classes; punctual submission of written work.

**Assessment:** 20% essay; 20% pitch and series outline; 60% final group scripts (4x 10 minutes for MA students).

**FAM5046S**  **FILM AND ENVIRONMENT**
24 NQF credits at HEQSF level 9

Convener: Dr I-M Rijsdijk

**Course entry requirements:** Acceptance for a master’s programme.

**Course outline:**
This course examines several debates concerning the representation of the natural environment in narrative fiction and documentary film. Taking the ecocritical debate that has grown in scope and intensity in literary criticism since the early 1980s as a departure point, the course will investigate
the value of this discourse and its applicability to films that either explicitly or implicitly use the natural environment as a key component of the film narrative.

Equally important is the analysis of the films in terms of film language, and the extent to which film produces original representations of environmental debates that characterise the current age. In this second aspect of the course lies the history of the natural environment in film (its place in well-established and popular genres like the Western, for example), as well as the representation of people in relation to the nonhuman environment in environmental documentary. The course includes a practical exercise in which students will produce a visual artefact that applies the idea of the course to local situations.

**DP requirements:** Attendance at all classes; punctual submission of written work.

**Assessment:** Seminar presentation 20%; short paper (2,500 words) 30%; long paper (4,000 words) and visual project 50%.

The Centre for Curating the Archive, which includes the Lucy Lloyd Archive and Research Centre (LLAREC) and Katrine Harries Print Cabinet, has been established as a vehicle for the conservation and creative use, through exhibition and publication, of both object, image and paper collections. It builds on UCT’s dual institutional strength in its numerous and valuable research collections on
which much critical research is based, and in its established, often innovative expertise in the area of presenting those collections. The linked research, often revealed in the public domain, uses these collections to facilitate and enrich public engagement with curatorial practice. It also aims to open up novel combinations of the historically separated domains of the creative arts, and the truth-claiming discourses of history and the social and natural sciences.

In coupling the avowedly creative activity of curation with the seemingly objective site of archive the CCA signals its intention to draw attention to past and present processes of the making of archives and collections of all kinds and the creation of meanings that flowed, and yet flow, therefrom.

The CCA is engaged in several partnerships, notably through its new Honours specialisation in Curatorship with Iziko Museums of South Africa, and with Professor Carolyn Hamilton’s Archive and Public Culture Initiative in developing ARC: the Visual University and its Columbarium (www.arc.uct.ac.za). The work of the CCA is represented on both its own website and at www.arc.uct.ac.za.

FIN4058F  PRACTICAL COMMUNICATION
24 NQF credits at HEQSF level 8
Convener: Professor P Skotnes and H Proud
Course entry requirements: Acceptance for an honours programme.
Course outline:
Curatorship demands the skill of writing clearly in different registers for different purposes; whether for press releases, exhibition labels, text panels, internal reports or academic essays for publication in books or catalogues. This course aims at developing students’ capacities and awareness of the different approaches to writing demanded by professional curatorial work. Emphases will be on accuracy and objectivity, as well as the virtues of précis and creativity in the writing of engaging texts aimed at visitors to museums and galleries. Apart from formal lectures, students will be taken on field visits to view current exhibitions and challenged to critically evaluate their effectiveness in terms of communication and design. While the course is mainly object-centred in its approach, a study of the role of text and image in relation to ‘conceptual’ curatorial approaches will also be encouraged. Intensive study of the associated texts and display tactics in a number of key exhibitions in art history will also be undertaken.

DP requirements: Attendance at all seminars and completion of all written work.
Assessment: A number of short projects will be set, subject to continuous feedback, discussion and revision. These will constitute a final portfolio to be submitted for examination at the end of the course (50%). Two long essays will count for 25% each.

FIN4059F  WORKING WITH MUSEUM COLLECTIONS
24 NQF credits at HEQSF level 8
Convener: Professor P Skotnes and Dr H Robertson
Course entry requirements: Acceptance for an honours programme.
Course outline:
This course explores museum collections as resources for research, interpretation and exhibition. To be an effective curator of a collection requires a broad, holistic understanding of the collection, including its historical, social, aesthetic and scientific contexts. A curator also needs to acquire specialised knowledge to unlock the research and educational potential of the collection and make it
accessible to broad audiences through exhibitions and public programmes. Iziko’s art and social
history collections will be used as a basis for elucidating multiple approaches to the understanding
and interpretation of collections. The focus of the course is interdisciplinary and outcomes include:
ability to apply research methodology in interpreting museum objects, tracing provenance and
significance of collections; understanding of the relationship between the tangible and intangible
aspects of collections, and hands-on experience of working with museum collections. Museum and
site visits provide the basis for critical engagement with collections and curators. The course also
introduces students to the ethical considerations and challenges that are presented by different
objects in museum collections.

**DP requirements:** Attendance at all seminars and workshops and completion of all written work.

**Assessment:** Presentation of a seminar/discussion on a selected topic and relevant readings with
submission of a written summary of main issues (20%); Object studies – each student, or a group of

The Kaplan Centre was established in 1980 under the terms of a gift to the University of Cape Town by the Kaplan Kushlick Foundation and is named in honour of the parents of Mendel and Robert Kaplan.

The Centre, the only one of its kind in Africa, seeks to stimulate and promote the field of Jewish studies at the University, with a special focus on research into the South African Jewish community. Multidisciplinary in scope, the Centre encourages the participation of scholars from a range of fields at UCT and beyond.

The Centre serves as a coordinating unit in the university, using its resources to invite distinguished scholars to UCT, to initiate and sponsor research that includes largescale historical and sociological studies, and to strengthen the university’s library holding of books, microfilms and archival sources. The Centre awards a limited number of undergraduate and graduate scholarships, as well as research grants.

The Centre organizes and hosts a regular roster of public lectures, symposia, and conferences. The latter includes an ongoing biennial conference series in partnership with the University of Southampton, University of Sydney, and Tulane University. **HST4021H  ADVANCED HISTORICAL METHODS AND APPROACHES**

24 NQF credits at HEQSF level 8

**Convener:** Dr B Kar

**Course entry requirements:** Acceptance for an honours programme.

**Course outline:**
This seminar course, compulsory for all honours students in the Department of Historical Studies, invites students to engage some of the key conceptual and methodological issues concerning the nature of the historical discipline and its modes of writing and enquiry. It is organised around the notion of ‘archives’, which we understand in its many different registers, both as an institutionalised order of evidence and as a shorthand for an entire epistemological complex. Taught by a team of historians, anthropologists, literary critics and sociologists over eight intensive weeks at the beginning of the first semester, this course aims at providing students with both a critical understanding of conceptual issues and a hands-on experience of the so-called primary sources. We engage with governmental, oral, ethnographic, mnemonic, statistical, literary, visual, digital, material, sonic and somatic archives in this course, trying to introduce students to the emergent styles of historical enquiry and reflect on the complex relationship between the academic discipline and its several popular and public variants. In the second semester students build upon these discussions to write customised course essays.

**DP requirements:** Attendance at all seminars and completion of all written work.

**Assessment:** Five response papers (50%); class participation (15%); course essay (35%).

**HST4034F**  ORAL HISTORY: METHOD, PRACTICE AND THEORY  
24 NQF credits at HEQSF level 8  
**Convener:** Associate Professor S Field  
**Course entry requirements:** Acceptance for an honours programme.  
**Course outline:**  
This option offers hands-on training in oral history research and interviewing skills and is suitable for students from a wide range of disciplines. The central focus is on the relationship between a person telling oral stories and another eliciting and listening to those stories. There is no simple road map on how to do oral history interviewing. Rather, training in oral history methodology is a learning process of how to make a series of research decisions appropriate to specific social, cultural and historical contexts. Students will learn how to do interviews on audio and video, and will explore applied theoretical approaches to oral narratives and memories. We will also explore questions of copyright, ownership, audio-visual archiving and the ways in which oral history can contribute to development practice. All students will have to complete an oral history project which could become a pilot study for an honours, master’s or doctoral dissertation.  
**DP requirements:** Attendance at all seminars and completion of all written work.

**HST4040F**  A HISTORY OF VIOLENCE: PERSPECTIVES FROM THE GLOBAL SOUTH  
24 NQF credits at HEQSF level 8  
**Convener:** Dr A Sen  
**Course entry requirements:** Acceptance for an honours programme  
**Co-requisites:** None  
**Course outline:**  
Can there be a history of violence if one takes structural violence as seriously as spectacular episodes? What does one do when one writes a history of violence? How can one begin to think of writing a history that can simultaneously approximate the experiential and the structural, the excess and the everydayness of violence? In critically reinterrogating the conventional distance between war and peace, this course will study different forms of violence that has produced the Global South in the form that we inhabit it. For us, the Global South is both a concrete political, geographical
location as well as a conceptual analytic through which histories of violence shall be approached. In bringing together a representative sample of critical theoretical literature and specific histories of violence along lines of race, ethnicity, class, gender, and minority across the colonial worlds, this course will address the interconnected debates in the fields of epistemology, law, politics and economy.

**HISTORIES OF LAND AND LABOUR STRUGGLES IN SOUTH AFRICA**  
24 NQF credits at HEQSF level 8  
**Convener:** C Naicker  
**Course entry requirements:** Acceptance for an honours programme  
**Co-requisites:** None  
**Course outline:**  
This course is designed to equip students to think beyond the narrow confines of South African nationalist historiographies of liberation. It focuses on the experiences and narratives of the working people who resisted, negotiated and, in some cases, successfully changed the oppressive system of racial capitalism in its different avatars of colonialism and apartheid. It offers a map of the history of labour struggles in the country in both unionised and extra-union forms. Critically reflecting on several key processes, structures and moments over the long twentieth century - from the creation of a racialized system of labour in the late nineteenth century to the present-day state of disarray in the labour movement and the new struggles for urban land and access to the city - this course introduces students to the many connections between the past and the present, the rural and the urban, and the formal and the informal sectors of economy. Students are encouraged to understand how this history offers an opportunity to think different trajectories of resistance and struggle, solidarity, negotiation and nationhood.

24 NQF credits at HEQSF level 8  
**Convener:** Dr M Mbali  
**Course entry requirements:** Acceptance for an honours programme  
**Co-requisites:** None  
**Course outline:**  
This course aims to deepen students’ understanding of the changing social and cultural forms related to biomedicine, health and healing both in Africa and globally. The socially constructed nature of biomedicine and healing will be explored with reference to institutions, practices, policies, diverse ways of knowing and subjectivities around the body and health. The course will also analyze the intersections between the social and material aspects of health (such as political economies and bodily systems and processes). Epistemologies of biomedicine and health will be explored with reference to: diverse views of disease ontology; biomedical professionalisation and therapeutic diversity; and, histories of mental health. The politics of health will be examined in relation to epidemics, public health and health policy and activism. Patient-focused histories of medicine and healing will also be central to the course, particularly those of: women; gender non-conforming and same-sex practicing individuals and groups; and disabled and racially marginalized people. Finally, students will be asked to engage with ethical issues in writing histories of medicine such as ensuring patient confidentiality and obtaining informed consent, addressing stigma and discrimination in relation to certain diseases and understanding healing traditions as described by historical figures on their own terms.

HST4043S  WRITING AND HISTORY
24 NQF credits at HEQSF level 8
Convener: Associate Professor S Jeppie
Course entry requirements: Acceptance for an honours programme
Co-requisites: None
Course outline:
Historians take for granted that we have to use sources, most often traces from the past in the form of written texts. But what is the history of writing itself? What are the histories of writing in various parts of the world? What are the connections between the articulation of language/s and the surfaces upon which they were inscribed and then moved and mobilized for a multitude of purposes? And beyond this what kinds of readings and traditions of slow and close reader philology, interpretation emerged to make sense of these written texts? What kinds of writing supports have developed and how has the codex become the norm (or not)? Until recently the dominant way of telling this story has been to focus on the origins of writing in Mesopotamia and then to move on to the growth of writing systems, some attention to book before printing (but mainly after the print revolution), and ultimately the emergence of philology as a largely western enterprise. In this course we explore this tradition itself. However, this course is not concerned with origins as much with multiple centres and multiple traditions of inscription on a variety of supports (stone, bamboo, wood, paper). We look at numerous scripts and the styles of philological engagement with written works which have their own presuppositions. This interdisciplinary course will appeal to students who are interested in history in the longer-term, material histories, book history, and world history through objects and intellectual history. This course is formulated in the knowledge that in recent years there has been a rise of interest in manuscript studies and philology.

HST4053F  DEBATES IN ECONOMIC HISTORY
(May not be offered in 2018)
24 NQF credits at HEQSF level 8
Convener: TBA
Course entry requirements: Acceptance for an honours programme.
Course outline:
One of the biggest puzzles of human history is why some countries became rich while others have remained poor. More specifically, the question of why early modern Western European countries advanced ahead of their non-Western counterparts has been the point of departure for many debates in economic history. Economic development can be understood in broad terms and comprises several aspects. Important are institutional changes, factor endowments, demographic transitions, the economic role of the scientific revolution and innovation, and the early growth of financial systems. Naturally, among these aspects are also patterns of international trade and globalisation. This course studies historical processes of economic growth, convergence and divergence in the global economy over the past four centuries and introduces students to both new and old perspectives on the determinants of economic prosperity.
DP requirements: Attendance at all seminars and completion of all written work.
Assessment: Coursework (100%).

24 NQF credits at HEQSF level 8
Convener: Dr M Mulaudzi

Economic development and change in the post-apartheid period has generated a host of new questions for South African Economic History. What role did imported technology, technological innovation and economic sanctions play in South Africa’s industrialisation? What was the
significance of sharecropping for the development of South African agriculture? What were the economic consequences of the collapse of reserve agriculture and environmental degradation in the reserves? What was the economic rationale for welfare under apartheid and beyond? How did South Africa re-join the global economy after 1994? These issues have generated rich debate and exciting new studies.

This course will take up these questions and explore the approaches adopted by economic historians.

**DP requirements:** Attendance at all seminars and completion of all written work.

**Assessment:** Coursework (100%).

**HST4056S** THEMES IN EVERYDAY HISTORY

*May not be offered in 2018*

24 NQF credits at HEQSF level 8

**Convener:** Dr B Kar

**Course entry requirements:** Acceptance for an honours programme.

**Course outline:**
This course is aimed at both acquainting students with the growing historical literature across the world on daily experiences and unspectacular practices, and teaching them the skills of formulating original research questions. Each year this course focuses on an object or a practice or a sentiment usually considered too ordinary, too universal and too familiar to be adequately or excitingly historical, and gradually unpacks the various histories unevenly woven into it. Through a systematic investigation of the experiential contexts and daily praxis, the students are encouraged to think imaginatively and across the boundaries of disciplines. In pointing the students towards the emergent approaches and sites of new research, the course also attempts to train them in moving responsibly and creatively between big theoretical questions and specific, concrete histories. It is comprised of weekly two-hour seminars. In 2017 the course will be discussing the histories of sleep.

**DP requirements:** Attendance at all seminars and completion of all written work.

**Assessment:** Three response papers (30%); 5,000-word essay (70%).

*TRAUMATIC TRACES: HISTORY, MEMORY AND BEYOND*

24 NQF credits at HEQSF level 9

**Convener:** Associate Professor S Field

**Course entry requirements:** Acceptance for a master’s programme

**Co-requisites:** None

**Course outline:**
This course traces the genealogy of the concept and theories of “trauma”. It will critique the clinical, popular, intellectual and political uses of the term from the late 19th century to the present. The course challenges students to be self-reflexive, critical thinkers, with the capacity to debate the “Trauma Question” and its implications for the emergence of memory studies, especially in post-conflict societies. We will also discuss the use of “trauma theories” in relation to debates around reconciliation, healing and reparations; and post-colonial critiques of trauma theories as Eurocentric and lacking in their account of race and cultural differences. Moreover, the “transmission of trauma” in family histories and the notion post-memory will be discussed. Finally, we discuss the “affect turn” and the historicising of emotions and subjectivities as a move to resolve the conceptual problems posed by trauma theories. The course is open to MA and PhD students from across the Faculty, especially those who have a dedicated interest in the histories, memories and theories of violence and its legacies.

**DP requirements:** Attend all seminars and complete all forms of course evaluation.

It focuses on the experiences and narratives of the working people who resisted, negotiated and, in some cases, successfully changed the oppressive system of racial capitalism in its different avatars of colonialism and apartheid. It offers a map of the history of labour struggles in the country in both unionised and extra-union forms. Critically reflecting on several key processes, structures and moments over the long twentieth century from the creation of a racialized system of labour in the late nineteenth century to the present-day state of disarray in the labour movement and the new struggles for urban land and access to the city this course introduces students to the many connections between the past and the present, the rural and the urban, and the formal and the informal sectors of economy. Students are encouraged to understand how this history offers an opportunity to think different trajectories of resistance and struggle, solidarity, negotiation and nationhood.

**HST5042F  THEORY AND METHOD IN HISTORIES OF MEDICINE, HEALTH AND HEALING**

24 NQF credits at HEQSF level 9  
Convener: Dr M Mbali  
Course entry requirements: Acceptance for a master's programme  
Co-requisites: None  
Course outline:  
This course aims to deepen students’ understanding of the changing social and cultural forms related to biomedicine, health and healing both in Africa and globally. The socially constructed nature of biomedicine and healing will be explored with reference to institutions, practices, policies, diverse ways of knowing and subjectivities around the body and health. The course will also analyze the intersections between the social and material aspects of health (such as political economies and bodily systems and processes). Epistemologies of biomedicine and health will be explored with reference to: diverse views of disease ontology; biomedical professionalisation and therapeutic diversity; and, histories of mental health. The politics of health will be examined in relation to epidemics, public health and health policy and activism. Patient-focused histories of medicine and healing from below will also be central to the course, particularly those of: women; gender non-conforming and same-sex practicing individuals and groups; and disabled and racially marginalized people. Finally, students will be asked to engage with ethical issues in writing histories of medicine such as ensuring patient confidentiality and obtaining informed consent, addressing stigma and discrimination in relation to certain diseases and understanding healing traditions as described by historical figures on their own terms.

**HST5043S  WRITING AND HISTORY**

24 NQF credits at HEQSF level 9  
Convener: Associate Professor S Jeppie  
Course entry requirements: Acceptance for a master's programme  
Co-requisites: None  
Course outline:  
Historians take for granted that we have to use sources, most often traces from the past in the form of written texts. But what is the history of writing itself? What are the histories of writing in various parts of the world? What are the connections between the articulation of language/s and the surfaces upon which they were inscribed and then moved and mobilized for a multitude of purposes? And beyond this what kinds of readings and traditions of slow and close reader philology, interpretation emerged to make sense of these written texts? What kinds of writing supports have developed and how has the codex become the norm (or not)? Until recently the dominant way of telling this story has been to focus on the origins of writing in Mesopotamia and then to move on to the growth of writing systems, some attention to book before printing (but mainly after the print revolution), and ultimately the emergence of philology as a largely western enterprise. In this course we explore this tradition itself. However, this course is not concerned with origins as much with multiple centres and multiple traditions of inscription on a variety of supports (stone, bamboo, wood, paper). We look at numerous scripts and the styles of philological engagement with written works which have their own presuppositions. This interdisciplinary course will appeal to students who are interested in history in the longer-term, material histories, book history, and world history through objects and intellectual history. This course is formulated in the knowledge that in recent years there has been a rise of interest in manuscript studies and philology.

HST5056S  THEMES IN EVERYDAY HISTORY
(May not be offered in 2018)
24 NQF credits at HEQSF level 9
Convener: Dr B Kar
Course entry requirements: Acceptance for a master's programme
Co-requisites: None
Course outline:
This course is aimed at both making the students acquainted with the growing historical literature across the world on the daily experiences and unspectacular practices, and teaching them the skills of formulating original research questions. Each year this course focuses on an object or a practice or a sentiment usually considered too ordinary, too universal and too familiar to be adequately or excitingly historical, and gradually unpacks the various histories unevenly woven into it. Through a systematic investigation of the experiential contexts and daily praxis, the students are encouraged to think imaginatively and across the boundaries of disciplines. In pointing the students towards the emergent approaches and sites of new research, the course also attempts to train them in moving responsibly and creatively between big theoretical questions and specific, concrete histories.

How have these ideas continued to shape identities and discourses in the present?

SLL4060F  CONTEMPORARY FRENCH LITERATURE I
24 NQF credits at HEQSF level 8
Convener: Professor JL Cornille
Course entry requirements: Acceptance for an honours programme.
Course outline:
If Louis-Ferdinand Céline’s influence on 20th century French literature is widely acknowledged, one is less aware of the influence left by his Journey to the end of the night on contemporary Francophone Literature. In spite of the racist nature of his ideology, Céline’s profoundly “oralised” body of works showed later generations how to combine the written and the spoken word – a question which is at the core of contemporary francophone literature, as produced in Africa and in the Caribbean Islands. This is why a Congolese writer such as Alain Mabanckou secretly refers to Céline; but we would argue that his interest for Céline has been sparked by readings of his compatriot and fellow writer, Daniel Biyaoula who openly made use of Journey to the end of the night to structure his novels.
DP requirements: Submission of all written work.
Assessment: Two essays (50% each).

SLL4061S  CONTEMPORARY FRENCH LITERATURE II
24 NQF credits at HEQSF level 8
Convener: Professor JL Cornille
Course entry requirements: Acceptance for an honours programme.
Course outline:
If Louis-Ferdinand Céline’s influence on 20th century French literature is widely acknowledged, one is less aware of the influence left by his Journey to the end of the night on contemporary
postcolonial Francophone Literature. In spite of the racist nature of his ideology, Céline’s profoundly “oralised” body of works showed later generations how to combine the written and the spoken word – a question which is at the core of contemporary francophone literature, as produced in Africa and in the Caribbean Islands. This is why a Caribbean writer such as Patrick Chamoiseau secretly made use of Céline’s novel Guignol’s band, in his second novel, Solibo Magnifique.

**DP requirements:** Submission of all written work.

**Assessment:** Two essays (50% each).

### SLL4063F  THEORY & PRACTICE OF TRANSLATION I

24 NQF credits at HEQSF level 8

**Convener:** TBA

**Course entry requirements:** Acceptance for an honours programme.

**Course outline:**
Students are introduced through readings to some of the main theories of translation by means of a thematic rather than a chronological approach. Attention is given to translation techniques and to their applicability by practising the translation of short texts and by reflecting on both the translation mechanisms at work and access to meaning. At the end of this course, students are familiar with translation theory and translation techniques and can reflect critically on theory as it is linked to practice.

**DP requirements:** Submission of all written work.

At each workshop the submissions of up to four class participants will be discussed. Each student is expected to submit a minimum of 40 pages of writing during the course of the semester. Students perform as readers of each other’s work, to write new material of their own, and to revise their writing.

Convener: T Herbst
Course entry requirements: A 70% pass in MUZ4371H Music Technology IV, or an equivalent course from another institution. Acceptance for a BMus honours or master’s programme.
Course outline:
Building on the pivotal role of over a century’s dialogue between music and technology in the creation, dissemination and appreciation of sound and music, the course considers components of what has come to be called Music Technology and the reasons no single, homogenous definition of Music Technology has emerged. In considering how distinctive but vibrant industries and research fields, ranging from audio engineering to film-sound practices, have come to be seen as distinct fields or specialisations, and are served by their own distinctive programmes, the course mimics that trend whilst building on practical skills and theoretical knowledge introduced in undergraduate and honours level Music Technology courses. In order to be able proficiently to merge research and vocational skills in sound-related occupations that demand critical thinking along with practical abilities, the course guides and encourages learners to:
(i) define and critically investigate key concepts and their definitions;
(ii) study the impact of technology-driven aesthetics on diverse musical composition styles;
(iii) contribute to the scholarly debates linking musicology and technology, and
(iv) become proficient at using soft- and hardware tools.
DP requirements: 100% attendance and submission of all assignments.
Assessment: Four written assignments 25% each = 100%.

(Not offered in 2018)
24 NQF credits at HEQSF level 8
Convener: Professor B Weiss
Course entry requirements: Acceptance for an honours programme and requisite philosophical background relevant to this course. Admission is at the discretion of the course convener.
Course outline:
The course is an investigation of the concepts of truth and linguistic meaning through recent work in the philosophy of language. A central question is whether truth can be recruited in an account of linguistic meaning, that is, whether we can, in general, think of the meaning of a declaritive sentence as consisting in the condition that must obtain for it to be true. Merits of the proposal are canvassed but so too are reasons for abandoning such accounts in favour of those which take conditions of use as determinants of meaning. Various use-conditional accounts are examined. The implications of such discussions for issues to do with semantic realism is a persistent theme.
DP requirements: Satisfactory attendance at seminars and submission of written work on time.
Assessment: Oral presentations and participation in weekly seminars (10%) three essays of approximately 3,000 words each (30% each).

In this case, as well as assessing the different arguments and views studied, the course will examine how philosophers from different times and places have (mis)interpreted and reacted to one another’s work.

**Convener:** Professor A Butler

**Course entry requirements:** Admission to an honours programme and by permission of the course convener.

**Course outline:**

The middle sections of the course investigate the causes, significance, and implications of the ‘democratic transition’ using a diversity of scholarly resources. In the final sections, students will explore some key issues in South Africa’s contemporary political life. They will focus on the party system; the nature of the post-apartheid state; the relationships between party, state and business; contests over the meaning of democracy; and the changing character of the ANC. This course will examine international, national and local approaches to post-conflict justice in African contexts and interrogate some of the normative and political debates raised by transitional justice processes. More than any other continent, Africa has been the site of transitional justice experimentation and thus it is important to analyses cases in which processes have been initiated in an effort to grapple with atrocities. In particular the course will attempt to assess the strengths and weaknesses of recent transitional justice processes in advancing post-conflict justice on the continent. The first part of the course examines the notion of post-conflict justice in relation to various concerns on the continent including socio-economic justice, land restitution, displacement, gender-justice and natural resource exploitation. It will also survey various models of post-conflict justice including truth seeking, criminal justice and reparations in contexts as diverse as Liberia, Kenya and Tunisia. Part Three will examine some of the questions that have emerged over the efficacy of transitional justice interventions and mechanisms on the continent.

Course entry requirements: Admission to a master’s programme. Relevant background studies in the areas of human rights, conflict and conflict-resolution, social and political theory.  
Course outline:  
This course will explore the field of transitional justice in a comparative and critical perspective. The first part of the course examines the notion of ‘transitional justice’ in relation to various theories of justice including restorative, retributive, reparative and social justice. Part Two will examine the “pillars” of transitional justice: truth seeking, criminal justice, reparations and institutional reform and will consider the relevance of these processes in post-conflict transformation. PBL5623F GOVERNING UNDER THE CONSTITUTION: LAW AND PRACTICE
Higher postgraduate course, first semester, one seminar per week.
30 NQF credits at HEQSF level 9
Convener: Professor P de Vos
Course entry requirements: See Rules for LLM and MPhil Degrees.
Course outline:
South Africa’s new Constitution sets out the rights of citizens and establishes a framework for democratic governance and local government. In developing these institutions, along with a multi-level system comprising national, provincial and local government, South Africa’s constitutional designers were responding to the needs and aspirations of contemporary South Africa. But they, in light of this comparative experience, also had before them a rich array of alternatives from other countries. The central purpose of this course is to seek to understand the new framework for governance in South Africa.
Constitutions are complex mixtures of broad principles, and specific rules and institutions. Accordingly, we will be interested in two levels of analysis: first, what broad principles and values underpin the institutional framework, and how are these expressed in the institutions themselves? And, second, more practically, how do these institutions, and the interactions among them, actually work in shaping the process of policy-making and implementation? Thus we are interested in the values associated with democracy – participation, accountability, consensus, etc; and in those associated with what might be called ‘effective governance’, in light of the policy challenges which face the country.
The course will thus also provide you with an understanding of how government works with a focus on (i) the relationship between the executive and the legislature and what that means for lawyers and (ii) the relationship between national, provincial and local government. Our study of multi-level government and the powers of each sphere of framework necessary for policy making and litigation in this area.
DP requirements: Satisfactory attendance at and participation in seminars and completion of written assignments.
Assessment: Written assignments count 30%; written examination counts 70% of the final grade.

PBL5815S  PUNISHMENT AND HUMAN RIGHTS

Higher postgraduate course, second semester.

30 NQF credits at HEQSF level 9

Convener: TBA

Course entry requirements: See Rules for LLM and MPhil Degrees.

Course outline:
This course aims to provide students with a sound theoretical understanding both of the justifications of punishment and human rights constraints in the context of sentencing. Students then apply this understanding to practical examples in order to assess how/ if the theory translates into practice. In so doing it is hoped to transcend a common-sense approach to sentencing and punishment and to build firm opinions/ approaches based on acquired knowledge.

The course is divided into four broad sections. The first section introduces the class to the various philosophical justifications that have historically been provided for sentencing. A brief introduction is also provided to the relationship between human rights law and penal sanctions. The second section explores in detail the current justifications for punishment/ purposes of the correctional system. In so doing, issues such as deterrence, incapacitation, rehabilitation, restoration, retribution and just deserts will be explored. Section three deals with constraints placed on sentencing in South Africa by human rights norms contained in the Bill of Rights and international law. The final section of the course places the preceding theoretical/philosophical discussions into a practical context by dealing with current and future sentencing practice in South Africa, modes of implementing punishment (e.g. prison) and special stakeholders in punishment.

DP requirements: 80% attendance at, and satisfactory participation in, seminars and the completion of the research papers and oral presentation.

Assessment: The presentation of at least one seminar and one research paper. Marks given for the seminars and research paper comprise the entire mark for the course.

**Mission Statement**
The Department of Religious Studies is committed to the study of religions which will contribute to public life in our local, regional, national and continental contexts. It is dedicated to:
- an open, plural, intercultural, and interdisciplinary study of religion in all its forms;
- the in-depth study of African religious traditions;
- the creative and critical analysis of religion as a force in personal, social, economic and political life;
- the promotion of quality education and research in the study of religion as a vital contribution to the transformation and development of South Africa.
The mission statement is implemented through degree specialisations that focus on the broad theme of religion, culture and identity. The Department offers a systematic study of religion in public life, its meaning and significance in South Africa in particular and Africa in general. This broad theme is explored in core courses team-taught by faculty members and also reflected in various research projects and institutes presently housed in the Department.

Core courses provide the thematic, methodological and theoretical foundations for all students who choose to pursue degrees in this department. Additional courses continue this focus within the established areas of specialisation: African Studies, Christian Studies, Comparative Studies, Islamic Studies, Jewish Studies, Buddhism and Critical Theory.

Courses in areas of specialisation

Hereunder follows a broad map of the courses offered in the areas of specialisation. Not all courses indicated below will be offered in any given year. However, they will follow the pattern outlined here.

African Studies
The courses in African studies explore the varieties of indigenous religious belief systems as well as the impact of global religions like Christianity (especially Pentecostalism) and Islam on the continent. Students will be prepared to do research on religion in Africa through different methodological and theoretical paradigms. A specialization in African studies can be pursued in combination with a focus on Christian and/or Islamic studies.

Buddhism
The department offers postgraduate study and supervision in Asian religious traditions with a special emphasis on Buddhism. Currently an Honours level course on Buddhism and Modernity and guided reading projects through Reading Religious Texts are offered. Research interests include the contemporary spread and transformations of Buddhism, Buddhism and Globalisation, conversion and socially and environmentally engaged Asian spiritualities, with a particular focus on Japan.

Christian Studies
The courses in Christian Studies focus mainly on the Sociology of Christianity and on the study of African Pentecostalism. The latter section debates the social impact and trajectories of Christian new religious movements and new forms of believing and being Christian as espoused by the Pentecostal-charismatic churches and ministries, their engagement with media (Internet use, religious broadcasting, production and reproduction of books, DVDs & podcasts, Pentecostal advertising: posters, billboards, handbills), fiscal and political practices.

Comparative Studies
The courses in Comparative Studies are divided into two categories: Issues in the Study of Religion and Religion in Contemporary Society. The first area includes courses in the Problem of Religion, Religion and Ritual, Sacred Space, Religion, Gender and Embodiment, and the History of Religions in Southern Africa. The second area includes courses in Religion and Popular Culture, Religion and Urban Culture and Religion, Education and Society in South Africa.

Islamic Studies
The courses in Islamic Studies explore Islam as religion, culture and civilization in particular contexts and themes. An Honours level course covers fundamental concepts within Islam from phenomenological and socio-historical perspectives. This course is indispensable for any student embarking on research relating to Islam at a post-graduate level. At the Master’s level, we offer specialized courses on Sufism, Islam in Africa, Gender, Islam and Feminism.
Philosophy of Religion/Critical Theory
The courses in Philosophy of Religion, Critical Theory and Post-Structuralist Thought address contemporary issues in European philosophy, philosophy of religion, modern Jewish thought and post-colonial theory. Courses such as Philosophers on Religion, Critical Theory, and Levinas, Derrida and the “Other” explore how reason, religion, ethics and subjectivity constitute meaning and value and how our social and historical conditions also contribute to life and meaning formation.

Weekly seminars
In addition to the normal course requirements, students are required to attend the seminars hosted during the course of the year. The intention of the seminars is to expose all postgraduates to seminars delivered by staff members and visitors to the Department. Attendance at all colloquia is compulsory and students will be required to reflect knowledge of their content in examinations. Details of these events will be advertised during the course of the year.

The projects are directed to a sustained study of Islam, values and historical change.

Through its projects, the CCI provides a place for researchers to share ideas and develop insights on Islam and Muslim societies. It creates a space where students are inspired and supported to embark upon a systematic study and reflection on issues of great interest to scholars and the general public. Scholarships at graduate level are available on a regular basis.

The CCI has both regular and occasional publications. *The Journal for Islamic Studies* is an annual peer-reviewed publication accredited by the Department of Education (South Africa), and ARIA - *Annual Review of Islam in Africa* provides a forum for young and established researchers to publish their findings in an accessible format.

**Professional registration and conduct**
Practice in the field of Social Work is regulated by the South African Council for Social Service Professions, with which all Social Workers must register. The Council lays down the minimum standards of both academic and practical training requisite for professional registration, and the Department of Social Development provides training according to these standards. The University offered a 3-year BSocSc degree in Social Work for students who first registered before 2007. These students were required to complete an appropriate Honours degree offered by the Department of Social Development in order to obtain professional registration with the South African Council for Social Service Professions. From 2007, students registered for a 4-year Bachelor of Social Work (BSW) degree in order to obtain professional registration with the South African Council for Social Service Professions.

Students registered for the professional degrees in social work are required by statute to register from their second year of study with the South African Council for Social Service Professions as a student social worker. As such they are bound by the Council’s professional code of conduct. Students who do not adhere to this code of conduct may be required to terminate their registration in the Faculty. Should a student in the course of his/her studies or who qualifies for the award of the
degree that allows for professional registration with the said Council be deemed unfit to practise as a social worker following a professional assessment, the Dean will report the outcome of such professional assessment to the Council and inform the student accordingly.

**Course Outlines:**

*Please note that where the same course is offered for both the honours (HEQSF level 8, 4000 level) and masters (HEQSF level 9, 5000 level) degrees, students must register for the course appropriate to their current qualification level. Students who have completed the 4000-level version of a course are excluded from enrolling on the 5000-level version of the same course and vice versa.*

The Faculty reserves the right to cancel course/s if there is insufficient student interest. Confirmation of whether the course/s will be offered will be published on Vula, Departmental and Postgraduate Faculty Notice-boards by the first Friday of the semester in which the course begins.

SOC4004S  POLITICAL SOCIOLOGY
12 NQF credits at HEQSF level 8
Convener: Dr R Chaturvedi
Course entry requirements: Acceptance for an honours programme.
Course outline:
This course revolves around the relationship between state and society. It proceeds from the understanding that state and society are not two radically separate realms but fields of action and meaning that continually make and unmake one another. Thus on the one hand this course will examine the nature of ideas, and the network of institutions and practices that make up the modern nation state especially in postcolonial Africa; on the other hand it will study the formation of socially embedded agents of power who have not only lived out their own aspirations of self-determination, democracy and justice but also revolted against nationalist and neo-liberal concordances. Popular protests in Africa and other parts in the global south will be our special focus of attention here. The ways in which state and society have mutually constituted one another will be a key concern. In order to understand that, the course will draw on classical and contemporary
theories as well as sociologically grounded ethnographies of political life particularly in the global south.

**DP requirements:** Attendance of all seminars and submission of all written assignments.

**Assessment:** Class participation, presentation and short report (35%); long essay of up to 7,000 words (65%).

Convener: TBC

**Course entry requirements:** Acceptance for an honours programme.

**Course outline:**
This is an elective course for Sociology combining the sociology of art and culture inaugurated by the classics of Sociology, the Frankfurt School and refined by Pierre Bourdieu. It will trace how local and international aesthetic acuity is socially constructed and will provide an opportunity for serious inter-disciplinary work across continents.

The course introduces students to the ways art and popular culture have been used and misused in nationalist, socialist and social movement discourses and practices in Europe, Asia, Latin America and Africa; how too, modernity in all contexts involved international and local entanglements and visions. It also throws new light on the way forms travel across and within social boundaries.

Convener: Dr J Grossman

The World Social Forum and many social movements and other organisations organise and mobilise around the slogan: “Another world is possible”. This course examines key features of working class experience in the context of globalisation. It examines the development of unions, social movements and protest action, focusing on the collective responses of the ‘discontents’ of globalisation. The central concern is acts and processes of resistance in the context of recurring capitalist crisis, and visions of alternative central to that resistance. Though a focus on selected organisations, events and issues, the course aims to contextualise and historicise working class resistance in the lived experience of globalisation and examine major debates within and about such resistance. questions are explored in the global context in which they exist.

12 NQF credits at HEQSF level 9

**Convener:** Associate Professor A Pande

deployed in the context of globalisation. Through a reading of theoretical texts about globalisation
and ethnographic case studies of real people experience these processes, we will ask: What can we
learn about gender, nation states, labour markets and globalisation from studying the encounter
between them? The course is loosely divided into three sections. After an introduction to the
theoretic debates around engendering globalisation, we will critically analyse the centrality of
gender in national security, sovereignty of nation states and in policing national borders. In the next
section we will discuss one of the most striking features of the contemporary global order: the
feminisation of the global labour force and the concomitant commodification of intimacy. The class
will end with some hopeful visions: alternative discourses and transnational alliances possible in the
context of this globalised and gendered world.

**SOC5056S  POLITICAL SOCIOLOGY**
12 NQF credits at HEQSF level 9  
**Convener:** Dr R Chaturvedi  
**Course entry requirements:** Acceptance for a master’s programme  
**Course outline:**
This course revolves around the relationship between state and society. It proceeds from the understanding that state and society are not two radically separate realms but fields of action and meaning that continually make and unmake one another. Thus on the one hand this course will examine the nature of ideas, and the network of institutions and practices that make up the modern nation state especially in postcolonial Africa; on the other hand it will study the formation of socially embedded agents of power who have not only lived out their own aspirations of self-determination, democracy and justice but also revolted against nationalist and neo-liberal concordances. Popular protests in Africa and other parts in the global south will be our special focus of attention here. The ways in which state and society have mutually constituted one another will be a key concern. In order to understand that, the course will draw on classical and contemporary theories as well as sociologically grounded ethnographies of political life particularly in the global south.  
**DP requirements:** Attendance of all seminars and submission of all written assignments.  
**Assessment:** Class attendance and participation (10%); presentation (25%); 6000-words final essay (65%). Masters students should draw on at least 2 whole books and 4 articles for their final paper.

**Course entry requirements:** Acceptance for a master’s programme  
**Course outline:**
This is an elective course for Sociology combining the sociology of art and culture inaugurated by the classics of Sociology, the Frankfurt School and refined by Pierre Bourdieu. The traditions are read through a variety of Africanist and Post-Colonial lenses to understand the relationship between social movements in society and forms of artistic signification. It will trace how local and international aesthetic acuity is socially constructed and will provide an opportunity for serious inter-disciplinary work across continents. The course introduces students to the ways art and popular culture have been used and misused in nationalist, socialist and social movement discourses and practices in Europe, Asia, Latin America and Africa; how too, modernity in all contexts involved international and local entanglements and visions. It also throws new light on the way forms travel across and within social boundaries.  
**DP requirements:** Attendance of all seminars.  
**Assessment:** Presentation (10%); assignments (30%); research paper (60%).

The humanities have long been vital to the creative and critical energies of societies in the throes of profound change. HUMA – the Institute for the Humanities in Africa – is a new initiative at UCT, intended to create a space of dynamic interdisciplinary community for scholars and students in the humanities at large. Fostering top-end academic research, HUMA seeks also to draw on that work to nurture critical public debate, promoting UCT’s vision of itself as a civic university contributing to the making of democratic citizenship. HUMA’s intellectual agenda is driven by two inclusive research themes ‘on being human’, and ‘circuits of consumption’, which inform and structure three primary objectives:

- to conduct and promote research that is historically grounded and theoretically engaged, with an eye to the ‘big’ theoretical and ethical questions that anchor South African issues in wider fields of experience and analysis. The combination of intellectual focus and breadth provided by HUMA’s research themes is intended to open up spaces for dialogue, collaboration and argument across disparate theoretical, epistemological and methodological traditions, and in ways that help examine the project of interdisciplinary work.

- to nurture the expertise and enthusiasm of graduate students interested in an academic career, through a combination of intensive and supportive doctoral supervision, and a broader programme of seminars, symposia and workshops that help develop the intellectual versatility and confidence which an academic career requires. A doctoral fellowship programme is central to the pursuit of this objective.

- to bring scholars and graduate students into conversation with interested publics, around issues of shared and topical concern. HUMA hopes to promote what public intellectuals in the humanities do best, which is to de-familiarise and unsettle established ways of seeing, think creatively about pressing social and political questions, and keep the imagination of alternative futures alive.

This mission is embedded in a particular understanding of our location in Africa. Africa is a landmass with a deep and complex history of connection and disconnection amongst its many
inhabitants; being African means being party to formative relationships of connection and disconnection that shape the ways we think and act. Our scholarship and debate, then, will be positioned in Africa, even if the focus of our deliberations is not limited to the continent.
