

Welcome

UCT's Faculty of Health Sciences is committed to improving the health of the people of South Africa and beyond. Ranked the #1 health sciences faculty in Africa in 2015/16*, its prestige today is rooted in over 100 years of excellence. This is the home of the oldest medical school in southern Africa, and the site of famous advances in healthcare – including the world's first successful heart transplant in 1967 and research that led to the development of the CT scan.

"Meeting the health needs of 55 million South Africans and a billion Africans demands vision and direction. And it starts with students who have a love of knowledge and are exposed to full-time research at a reputable institution. This is how you produce Nobel prize-winners, and how we meet the greater need for doctors and health practitioners in the country and on the continent. It's a vision UCT's Faculty of Health Sciences is committed to and puts into practice daily. Our success is measured by the impact that staff and graduates have on people's lives."

PROF BONGANI MAYOSI
Dean of Health Sciences

Did you know?

- 1 On average, more than three peer-reviewed articles are published by faculty researchers every day.
- 2 Ten health science academics have had national orders (South Africa's highest award for citizens) bestowed on them.
- 3 Every first-year student is assigned a mentor from their department who helps them to acclimatise to their study programme and to life at UCT.

UNIVERSITY OF CAPE TOWN
IYUNIVESITHI YASEKAPA • UNIVERSITEIT VAN KAAPSTAD

2 000+ staff

undergraduates

2 100+

postgraduates

2 300+

117 postdoctoral fellows from 25 different countries, 81% of whom are from Africa

Research

25 research groupings spanning basic, clinical, rehabilitation and public health sciences

R764 million in research contracts entered into in 2015

11 A-RATED RESEARCHERS*

11 South African research chairs**

534 postgraduates graduated in 2015, including 58 PhDs

*As rated by the National Research Foundation

**Research positions jointly funded by the Department of Science and Technology and the National Research Foundation, aimed at strengthening South Africa's ability to produce high-quality research, innovation and students.

13 departments

Anaesthesia and Perioperative Medicine offers excellent clinical service, training and research through the divisions of acute pain service, cardiothoracic anaesthesia, critical care, paediatric anaesthesia and the chronic pain management clinic.

Health and Rehabilitation Sciences encompasses a range of allied health disciplines, including disability studies, occupational therapy, physiotherapy, nursing and midwifery, and communication sciences and disorders.

Health Sciences Education, established in 2015, works to enhance the quality of education across the faculty and in all teaching facilities used by the faculty.

Human Biology brings together several medical scientific and clinical academic disciplines: biomedical engineering, cell biology, clinical anatomy and biological anthropology, exercise science and sports medicine, human nutrition, and physiological sciences.

Integrative Biomedical Sciences provides teaching and training in basic biochemical sciences and computational biology to undergraduate students in the faculty, and is focused on building capacity in scarce skills in South Africa, including bioinformatics and large data analysis, as well as integrative and multidisciplinary molecular sciences.

Medicine is based in Groote Schuur Hospital and consists of 18 clinical divisions and ten major research units that play a leading role in undergraduate and postgraduate medical education and research.

Pathology undertakes basic and applied scientific research aimed at understanding the mechanisms, diagnosis, prevention and treatment of diseases.

Obstetrics and Gynaecology trains medical students in obstetrics and gynaecology from the third year to the sixth year of the curriculum, followed by postgraduate training that includes the development of the sub-specialities in obstetrics and gynaecology.

Paediatrics and Child Health aims to promote, restore and maintain the health and well-being of children and adolescents by providing clinical services, research, undergraduate and postgraduate training, programme and policy support and advocacy for child health.

Psychiatry and Mental Health aims to integrate teaching, research and clinical services. This integrated approach takes place across the different divisions in addiction psychiatry, child and adolescent psychiatry, liaison psychiatry, forensic mental health, intellectual disability psychiatry, neuropsychiatry, general adult psychiatry, psychopharmacology and biological psychiatry, psychotherapy and public mental health.

Public Health and Family Medicine is a strong multidisciplinary department with divisions in public health medicine, family medicine, occupational medicine, epidemiology and biostatistics, health economics, health policy and systems, social and behavioural sciences, and environmental health.

Surgery includes general surgery, cardiothoracic surgery, emergency medicine, neurosurgery, ophthalmology, paediatric surgery, orthopaedic surgery, otorhinolaryngology, plastic and reconstructive surgery, and urology.

Radiation Medicine includes nuclear medicine, radiation oncology, radiology and medical physics.
